Social Change Luigi Morelli, 2021-11-03 Social change is more than a political statement or demand it is a moral and spiritual imperative If this is so then it involves the whole human being in the way he perceives and thinks feels and relates and acts on and impacts the world This work gathers the threads of pioneers and visionaries in various aspects of social and cultural renewal Paradigms of include and transcend offer us paths along which the personal and the global are intimately intertwined Through established pathways and processes we can experiment with new ways of being as we impact our immediate world Practically speaking this book explores three avenues to change At a first level we can start to recognize that society is built around three poles Besides the public and private sectors civil society has emerged to play a crucial role and alter dualistic thinking If we think beyond capitalism and socialism and all their variations and combinations new unthought of frontiers and possibilities emerge It is possible to expand our practice of democracy beyond the majority minority dynamics to the inclusion of all stakeholders A new art and science of civic collaboration can break the gridlocks of polarization and opposition We can engage in a new area of honest energetic collaboration moving beyond weak compromise through an array of social tools that have grown in the last forty to fifty years and have now reached full maturity Lastly we can expand organizational and social forms in ways that completely break away from the past We can reconcile both entrepreneurial and participatory paradigms and transcend top down or bottom up models in ways that our intellect alone cannot fathom Paradigms offer generous visions but are also exacting masters The new revolution will request as much of ourselves as we will request of the world Remaking the North American Food System C. Sustainable Food Futures Jessica Duncan, Megan Bailey, 2017-08-04

Securing sustainable food for everyone is one of the world's most pressing challenges, but research, policy and programmes remain fragmented and effective solutions have been slow to emerge. This book takes on these challenges by proposing a range of solutions that can advance pathways towards sustainable food futures. Complete with recipes, this book is structured so that readers are taken in a logical progression through discussions of solutions, highlighting the need to recognise the importance of place and the importance of participation and to challenge dominant descriptions of markets through to re-designing food systems. The solutions presented in this book are based on real-world cases, but discussions remain deliberately broad to encourage thinking in new ways. Cases are drawn from Africa, Asia, Europe and North and South America. The book is of relevance to those interested in sustainable food futures and can serve as a supplementary textbook for a wide range of courses in food studies and related disciplines.
