Challenges to Marine Ecosystems John Davenport, Gavin M. Burnell, Tom Cross, Mark Emmerson, Rob McAllen, Ruth Ramsay, Emer Rogan, 2009-01-29 This volume presents a representative sample of contributions to the 41st European Marine Biology Symposium held in September 2005 in Cork Ireland The theme of the symposium was Challenges to Marine Ecosystems and this was divided into four sub themes Genetics Marine Protected Areas Global Climate Change and Marine Ecosystems Sustainable Fisheries and Agriculture The world s marine ecosystems face multiple challenges some natural but many resulting from humankind s activities Global climate change driven by influences of energy usage and industrial practices is a reality now accepted by most of the world s scientists media and political establishments Warming seas and rising sea levels are regarded as threats while visionaries consider deep ocean carbon disposal as a technological opportunity Exploitation of the seas continues apace with repeated concerns over the impact of over fishing plus reservations about the environmental effects of marine aquaculture We need to understand how resilient organisms and ecosystems are to these challenges while responding by protecting biologically meaningful areas of the oceans The subthemes of the 41st European Marine Biology Symposium address all of these matters

The Lives of Sharks Daniel Abel, R. Dean Grubbs, 2023-09-19 A richly illustrated and comprehensive introduction to the world s sharks Sharks are the top predators in many marine ecosystems But tales of the killer instincts and fearsomely sharp senses of these hunters can obscure their full life histories In fact sharks are characterful exhibit surprisingly complex behaviors and lead secretive lives full of interest in every type of marine habitat The Lives of Sharks is a fascinating and beautifully illustrated guide to these iconic marine creatures from two world renowned experts This book explores shark physiology anatomy behavior ecology and evolution as well as conservation and the impact of human activity on shark populations With stunning photographs and illustrations as well as profiles of selected species this is a comprehensive authoritative and inviting introduction to global shark life today

Shark Electrosense Raina Mooncrest, AI, 2025-02-27 Shark Electrosense explores the captivating sensory world of sharks focusing on their remarkable ability to detect electrical fields through electroreception This unique sense facilitated by the ampullae of Lorenzini allows sharks to locate hidden prey navigate vast oceans and interact with their environment in ways previously not fully understood The book highlights how electroreception influences hunting strategies and predator prey interactions offering insights into the sensory ecology of these fascinating creatures The book begins with a historical overview of electroreception and then progresses to discuss the biological mechanisms that support this before moving into the

ecological significance of electrosense Using varied sources including anatomical studies and behavioral observations the book reveals how this sense has shaped the evolution and behavior of elasmobranchs A dedicated chapter explores the potential for developing shark deterrents by exploiting their electrosensitivity Ultimately this book challenges traditional perceptions of shark sensory biology and underscores the importance of electroreception in understanding shark behavior and conservation
