United States acquired astonishing wealth and power as the result of what we now refer to as modernization Originating in England and Western Europe transplanted to the Americas then copied around the world in the nineteenth and twentieth centuries this process locked together science and technology political democracy economic freedom and competitive capitalism This has produced for some populations unimagined wealth and material comfort yet it has also now brought the global environment to a tipping point beyond which life as we know it may not be sustainable How did we come to endanger the very future of life on earth in our heedless pursuit of wealth and happiness In Laid Waste John Lauritz Larson answers that question with a 350 year review of the roots of an American culture of exploitation that has left us free rich and without an honest sense of how this crisis came to be Larson undertakes an ambitious historical synthesis seeking to illuminate how the culture of exploitation grew out of the earliest English settlements and has continually undergirded U S society and its cherished myths Through a series of meditations on key concepts the story moves from the starving times of early Jamestown through the rise of colonial prosperity the liberation of the revolutionary generation the launching of the American republic and the emergence of a new global industrial power by the end of the nineteenth century Through this story the book explores the rise of an American sense of righteousness entitlement and destiny that has masked any recognition that our wealth and success has come at expense to anyone or anything Part polemic part jeremiad and part historical overview Laid Waste is a provocative and bracing account of how the development of American culture itself has led us to today s crises

From Presidio to the Pecos River Orville B. Shelburne, Jr., 2020-10-08 The 1848 treaty of Guadalupe Hidalgo that ended the Mexican American War described a boundary between the two countries that was to be ascertained by a joint boundary commission effort The section of the boundary along the Rio Grande from Presidio to the mouth of the Pecos River was arguably the most challenging and it was surveyed by two American parties one led by civilian surveyor M T W Chandler in 1852 and the second led by Lieutenant Nathaniel Michler in 1853 Our understanding of these two surveys across the greater Big Bend has long been limited to the official reports and maps housed in the National Archives and never widely published The discovery by Orville B Shelburne of the journal kept by Dr Charles C Parry surgeon botanist geologist for the 1852 party has dramatically enriched the story by giving us a firsthand view of the Chandler boundary survey as it unfolded Parry s journal forms the basis of *From Presidio to the Pecos River* which documents the day to day working of the survey teams The story Shelburne tells is one of scientific exploration under duress surveyors stranded in towering canyons overnight without food or shelter piloting inflatable rubber boats down wild rivers rising to the challenges of a profoundly remote area including the possibility of Indian attack Shelburne s comparison of the original boundary maps with their modern counterparts reveals the limitations of terrain and equipment on the survey teams Shelburne s book provides a window on the adventure near disaster and true accomplishment of the surveyors work in documenting the course of the Rio Grande across the Big Bend region
