fashion     The Vision of René Magritte René Magritte,1962     *Worlds Within and Worlds Without* Michael Jackson,2023-04-15 Anthropologist Michael Jackson predicates his intellectual autobiography *Worlds Within and Worlds Without* on the view that works and lives are intimately entangled Through a skillful interweaving of personal and ethnographic descriptions he focuses on the imaginative and practical ways human beings negotiate the space between worlds they call their own and worlds they regard as lying beyond their immediate purview Whether the worlds that elude our empirical grasp are identified with divinities or the dead ether or earth history or myth the Internet or the nation state we experience them ambivalently as potential sources of wellbeing and as possible threats to our very existence Closing ourselves off from the world is not an option for our humanity depends on the ties that bind us to significant others and others to us As Jackson shows the relationship between the familiar and the foreign is not only an existential issue that all human beings address in one way or another It is a methodological issue for anthropologists concerned with the complementarity of individual and collective perspectivesethnos and anthropos the intrapsychic and the intersubjective

*Minor Photography* Mieke Bleyen,2012 The first book to apply the concept of the minor to the theory of photography The notion of the minor developed by Gilles Deleuze and Félix Guattari in *Kafka Towards a minor literature* 1975 is introduced and connected applied here for the very first time to the field of photography theory Deleuze and Guattari defined minor literature in terms of deterritorialization politicization and collectivization By transferring the minor to the medium of photography this book enlarges the idea of the minor and opens it up to all kinds of mutations in the process The essays gathered in this book discuss the ways in which photography can make the dominant codes of representation stammer and how it can produce new effects and address people yet to come The authors consider the minor as a valuable tool to help photography research move beyond or in between binary and hierarchized ways of thinking of high and low art for example or centre and periphery As such it aims to contribute to a rethinking of photography as multiplicity and variation Consequently the term is connected with both marginal and canonical photographic practices covering photographers as different as Miroslav Tichy Paul McCarthy Tacita Dean Dan Graham and Paul Noug After developing a theory of the minor this book explores how the operations of the minor can be found in major art practices It closes by tackling the question of photography as variation in case studies of belated forms of surrealist photography This publication is GPRC labeled Guaranteed Peer Reviewed Content     Magritte University of St. Thomas (Houston, Tex.).
