New Approaches to Contrastive Linguistics Renata Enghels,Bart Defrancq,Marlies Jansegers,2020-07-20 The practice of comparing languages has a long tradition characterized by a cyclic pattern of interest Its meeting with corpus linguistics in the 1990s has led to a new sub discipline of corpus based contrastive studies The present volume tackles two main challenges that had not yet been fully addressed in the literature namely an empirical assessment of the nature of the data commonly used in cross linguistic studies e g translation data versus comparable data and the development of advanced methods and statistical techniques suitably adapted to contrastive research settings The papers collected in this volume endeavour to find out what new types of data are most useful for what kind of contrastive questions and which advanced statistical techniques are most suited to deal with the multidimensionality of contrastive research questions Answers to these questions are provided through the contrastive analysis of various language pairs or groups and a wide variety of phenomena situated at almost all linguistic levels In sum this book provides an update on new methodological and theoretical insights in empirical contrastive linguistics and will stimulate further research within this field

Evidence for Linguistic Relativity Susanne Niemeier,René Dirven,2000-04-15 This volume has arisen from the 26th International LAUD Symposium on Humboldt and Whorf Revisited Universal and Culture Specific Conceptualizations in Grammar and Lexis While contrasting two or more languages the papers in this volume either provide empirical evidence confirming hypotheses related to linguistic relativity or deal with methodological issues of empirical research These new approaches to Whorf s hypotheses do not focus on mere theorizing but provide more and more empirical evidence gathered over the last years They prove in a very sophisticated way that Whorf s ideas were very lucid ones even if Whorf s insights were framed in a terminology which lacked the flexibility of linguistic categories developed over the last quarter of this century especially in cognitive linguistics To date there is sufficient proof to claim that linguistic relativity is indeed a vital issue and the current volume confirms a more general trend for rehabilitating Whorf s theory complex and also offers evidence for it It contains articles written by scholars from various fields of linguistics including phonology psycholinguistics language acquisition historical linguistics anthropological linguistics and cross cultural semantics which all contribute to a re evaluation and partial reformulation of Whorf s thinking
