Emerson, 2016-05-13 The Scottish Enlightenment was a period of intellectual and scientific progress in a country previously considered to be marginal to the European intellectual scene Yet the enlightenment was not about politeness or civic humanism but something more basic the making of an improved society which could compete in every way in a rapidly changing world David Hume writing in 1752 commented that industry knowledge and humanity are linked together by an indissoluble chain Collectively this volume of essays embraces many of the topics which Hume included under industry knowledge and humanity from the European Enlightenment and the Scots relation to it to Scottish social history and its relation to religion science and medicine Overarching themes of what it meant to be enlightened in the eighteenth century are considered alongside more specific studies of notable figures of the period such as Archibald Campbell 3rd Duke of Argyll and David Hume and the training and number of Scottish medical students Together the volume provides an opportunity to step back and reconsider the Scottish Enlightenment in its broader context and to consider what new directions this field of study might take **Signed English for the Classroom** Ralph R.
