On Closed 3-Braids Kunio Murasugi, 1974-12-31 The relationships between the conjugate classes of 3 braids and the link types of their closure are investigated and it is shown that the product link type of closed pure 3 braid is determined by its conjugate class

New Developments in the Theory of Knots Toshitake Kohno, 1990 This reprint volume focuses on recent developments in knot theory arising from mathematical physics especially solvable lattice models Yang Baxter equation quantum group and two dimensional conformal field theory This volume is helpful to topologists and mathematical physicists because existing articles are scattered in journals of many different domains including Mathematics and Physics This volume will give an excellent perspective on these new developments in Topology inspired by mathematical physics

Knots, Low-Dimensional Topology and Applications Colin C. Adams, Cameron McA. Gordon, Vaughan F.R. Jones, Louis H. Kauffman, Sofia Lambropoulou, Kenneth C. Millett, Jozef H. Przytycki, Renzo Ricca, Radmila Sazdanovic, 2019-06-26 This proceedings volume presents a diverse collection of high quality state of the art research and survey articles written by top experts in low dimensional topology and its applications The focal topics include the wide range of historical and contemporary invariants of knots and links and related topics such as three and four dimensional manifolds braids virtual knot theory quantum invariants braids skein modules and knot algebras link homology quandles and their homology hyperbolic knots and geometric structures of three dimensional manifolds the mechanism of topological surgery in physical processes knots in Nature in the sense of physical knots with applications to polymers DNA enzyme mechanisms and protein structure and function The contents is based on contributions presented at the International Conference on Knots Low Dimensional Topology and Applications Knots in Hellas 2016 which was held at the International Olympic Academy in Greece in July 2016 The goal of the international conference was to promote the exchange of methods and ideas across disciplines and generations from graduate students to senior researchers and to explore fundamental research problems in the broad fields of knot theory and low dimensional topology This book will benefit all researchers who wish to take their research in new directions to learn about new tools and methods and to discover relevant and recent literature for future study

Research Directions in Symplectic and Contact Geometry and Topology Bahar Acu, Catherine Cannizzo, Dusa McDuff, Ziva Myer, Yu Pan, Lisa Traynor, 2022-02-02 This book highlights a number of recent research advances in the field of symplectic and contact geometry and topology and related areas in low dimensional topology This field has experienced significant and exciting growth in the past few decades and this volume provides an accessible introduction into many active research problems in this area The papers were written with a broad audience in mind so as to reach a wide range of mathematicians at various levels Aside from teaching readers about developing research areas this book will inspire researchers to ask further questions to continue to advance the field The volume contains both original results and survey articles presenting the results of collaborative research on a wide range of topics These projects began at the Research

Collaboration Conference for Women in Symplectic and Contact Geometry and Topology WiSCon in July 2019 at ICERM Brown University Each group of authors included female and nonbinary mathematicians at different career levels in mathematics and with varying areas of expertise This paved the way for new connections between mathematicians at all career levels spanning multiple continents and resulted in the new collaborations and directions that are featured in this work
