Harris, Mehrzad Nadji, 1987 To find more information about Rowman and Littlefield titles please visit [www rowmanlittlefield com](http://www.rowmanlittlefield.com) **Modeling the Regional Economic Impacts of Major New Military Bases**

,1983 **The Geography of Competition** John R. Miron, 2010-03-16 This book provides a comprehensive up to date and expert synthesis of location theory What are the impacts of a firm s geographic location on the locations of customers suppliers and competitors in a market economy How when and why does this result in the clustering of firms in space When and how is society made better or worse off as a result This book uses dozens of locational models to address aspects of these three questions Classical location problems considered include Greenhut Manne Hitchcock Koopmans and Weber Launhardt The book reinterprets competitive location theory focusing on the linkages between Walrasian price equilibrium and the localization of firms It also demonstrates that competitive location theory offers diverse ideas about the nature of market equilibrium in geographic space and its implications for a broad range of public policies including free trade industrial policy regional development and investment in infrastructure With an extensive bibliography and fresh interdisciplinary approach the book will be an invaluable reference for academics and researchers with an interest in regional science economic geography and urban planning as well as policy advisors urban planners and consultants **Regional Development**

Modeling, Theory and Practice Murat Mikhailovich Albegov, International Institute for Applied Systems Analysis. Regional Development Task, 1982 **Handbook of Regional and Urban Economics** P. Nijkamp, Edwin S. Mills, P. C. Cheshire, 1986 This second volume of the Handbook presents professional surveys of all the important topics in urban economics The first section contains 6 surveys on locational analysis the second 5 surveys of specific urban markets and the third part presents 5 surveys of government policy issues The book brings together exhaustive research by distinguished scholars from many countries It is the only complete survey volume of urban economics and should serve as a reference volume to scholars and graduate students for many years For more information on the Handbooks in Economics series please see our home page on [http www elsevier nl locate hes](http://www.elsevier.nl/locate/hes) **Empirical Regional Economics** Richard S. Conway Jr., 2022-04-23 This textbook offers

an introduction to empirical regional economics including a comprehensive and systematic overview of the fundamentals history development and applications of economic base models It not only provides a sound basis for regional economics and regional economic analysis but it also includes numerous applications of the underlying theory The book has an empirical orientation highlighting the value of observation and testing in order to explain regional economic behavior Theory plays an important role in this study but it is only a starting point The book is divided into three parts the first discusses the economic base theory of regional growth and the empirical evidence supporting it while the second part covers the specification and

application of four increasingly complex regional economic models the economic base model the input output model the interindustry econometric model and the structural time series model Lastly the third part presents forty eight regional economic case studies organized under seven headings including economic cycles economic policy and regional forecasting Given its scope the book appeals to upper undergraduate and graduate students majoring in economics economic geography and business as well as to anyone in the private or public sector interested in gaining a better understanding of practical methods of regional economic forecasting and analysis For additional course material please check the author s website <https://www.empiricalregionaleconomics.com> Theories of Local Economic Development James E. Rowe, 2016-12-05 In economic development theory and practice exist as two seemingly separate realities Academics strive to develop or refine theory by drawing on abstract concepts about the way people behave and institutions work while practitioners draw from a stock of experiences By bringing together leading theorists and practitioners such as Blakely Blair McCann Luger Gunder Stough and Stimson this book provides the first comprehensive overview of local economic development theories for over fifteen years It explores the theory behind the key concepts that every economic practitioner must understand and in doing so ties together the various theories from across the disciplines to practice **Multiregional Economic Modeling** Boris Issaev, 1982

Handbook on Entropy, Complexity and Spatial Dynamics Reggiani, Aura, Schintler, Laurie A., Czamanski, Danny, Patuelli, Roberto, 2021-12-14 This ground breaking Handbook presents a state of the art exploration of entropy complexity and spatial dynamics from fundamental theoretical empirical and methodological perspectives It considers how foundational theories can contribute to new advances including novel modeling and empirical insights at different sectoral spatial and temporal scales
