Alternative Approaches in Macroeconomics Philip Arestis, 2018-02-07 This book honours Professor John McCombie's retirement by exploring a variety of themes theories and debates in non orthodox macroeconomics With contributions from leading scholars the book covers diverse ground in economic thought policy empirical work and modelling It demonstrates ongoing presumptions and asks probing questions of topical questions from the increase of income equality to the international variation of productivity investment This collection will appeal to academics and students with an interest in the history of macroeconomic thinking **Index of Economic Articles in Journals and Collective Volumes** American Economic Association, 2003 *Spatial Economic Science* Aura Reggiani, 2012-12-06 With the dawn of the twenty first century comes the awareness that current rapid political economic social and technological transformations will affect our of living by producing new forms of information communications common way market work style and leisure In this context human behaviour will certainly change its fixed parameters It is likely that the relationships between internal structures and external influences between individual components and collective behaviour as well as between multi scale networks and interrelated dynamics will show spatio temporal patterns which will be difficult to predict by means of our usual tools As a consequence academic research is increasingly being required to play an active role in addressing new ways of understanding and forecasting the sets of interacting structures ranging from the technical to the organizational and from the social to the economic and political levels while at the same time incorporating concerns about the new economy environment society information and technology It is now evident that social science especially spatial and economic science needs innovative paths together with continuous cross fertilization among the many disciplines involved In order to investigate these intriguing perspectives we seem to have embarked on an era of methodological reflections rather than developing strong theoretical foundations This volume aims to provide an overview of these new insights and frontiers for theoretical methodological studies and research applications in the space economy **Index of Economic Articles in Journals and Collective Volumes** , 2003 **Journal of Economic Literature** , 2007 **Asia-Pacific Transitions** D. Andersson, J. Poon, 2001-01-19 Modern focus on the Asia Pacific has centred on its rapid transformation in the span of a mere two decades Since the 1997 economic crisis however attention has now turned to transition issues as the region faces the challenge of global structural transformation that has and will affect the direction of the region's long term development Drawing from a range of contributors from several disciplines this book seeks to capture some of the multifaceted dimensions of these transitions as the region adjusts to new global realities *Dynamic Capabilities Between Firm Organisation and Local Systems of Production* Riccardo Leoncini, Sandro Montresor, 2007-12-21 Changes in technology and demand require firms to learn how to continuously reshape unique and non imitable resources and competences A firm's capacity to achieve this is captured by the concept of dynamic capabilities This book offers an analysis of how firms manage to reconfigure their

and Subsector Competitiveness Ellen T. Fitzpatrick, 1999

B. Dixon, Dale Jorgenson, 2013-01-08 Top scholars synthesize and analyze scholarship on this widely used tool of policy analysis in 27 articles setting forth its accomplishments difficulties and means of implementation Though CGE modeling does not play a prominent role in top U S graduate schools it is employed universally in the development of economic policy This collection is particularly important because it presents a history of modeling applications and examines competing points of view Presents coherent summaries of CGE theories that inform major model types Covers the construction of CGE databases model solving and computer assisted interpretation of results Shows how CGE modeling has made a contribution to economic policy

The Geography of Competition John R. Miron, 2010-03-16 This book provides a comprehensive up to date and expert synthesis of location theory What are the impacts of a firm s geographic location on the locations of customers suppliers and competitors in a market economy How when and why does this result in the clustering of firms in space When and how is society made better or worse off as a result This book uses dozens of locational models to address aspects of these three questions Classical location problems considered include Greenhut Manne Hitchcock Koopmans and Weber Launhardt The book reinterprets competitive location theory focusing on the linkages between Walrasian price equilibrium and the localization of firms It also demonstrates that competitive location theory offers diverse ideas about the nature of market equilibrium in geographic space and its implications for a broad range of public policies including free trade industrial policy regional development and investment in infrastructure With an extensive bibliography and fresh interdisciplinary approach the book will be an invaluable reference for academics and researchers with an interest in regional science economic geography and urban planning as well as policy advisors urban planners and consultants
