Rethinking Regulation of International Finance Uzma Ashraf Barton, 2016-04-24

Why have financial standards and institutions almost always failed to effectively predict and respond to real world financial crises The answer this challenging book shows is that international financial law suffers from a persistent lack of judicial or quasi judicial enforcement mechanisms leaving flaws in the structure of the international financial system that lead inevitably to excesses that threaten the public good of global financial stability The author an internationally renowned legal expert on financial and fiscal reforms responds to the increasingly urgent call for rethinking the structure and the functioning of international financial law Centering on the concept of enforcement which continues to be an unresolved issue in the discipline of international financial law the analysis describes the likely contours of hard law regulatory reform It weighs the pros and cons of much talked about regulatory and policy issues like the following and more policy implications from the transformation of finance from a domestic to an international concept new or revised supervisory and regulatory bodies with redefined mandate jurisdictions and powers possibility of a treaty based structure similar to the European Union s integration framework and consolidation of crisis prevention and crisis management policies The analysis takes into account instances from trade and monetary systems pertinent to the development of the discipline of international financial law A concluding chapter explores possibilities for putting in place an asset backed resilient financial system based on risk sharing and empowered to legislate reform and authorized to seek compliance from its members With its provision of unconventional alternatives for further development of international financial law to realize stable predictable and robust international markets including early warning systems and fully primed crisis prevention mechanisms the book explores the essential link between global financial stability effective regulation and institutional development that will engender realistic global policy solutions It will prove to be of great

importance to regulatory and legal practitioners as well as to academic and think tank scholars

Regulating Capital David Andrew Singer, 2015-11-15 Financial instability threatens the global economy The volatility of capital movements across national borders has led many observers to argue for a reformed global financial architecture a body of consistent rules and institutions to prevent financial crises Yet regulators have a decidedly mixed record in their attempts to create global standards for the financial system David Andrew Singer seeks to explain the varying pressures on regulatory agencies to negotiate internationally acceptable rules and suggests that the variation is largely traceable to the different domestic political pressures faced by regulators In *Regulating Capital* Singer provides both a theory of the effects of domestic pressures on international regulation and a detailed analysis of regulators attempts at international rulemaking in banking securities and insurance Singer addresses the complexities of global finance in an accessible style and he does not turn away from the more dramatic aspects of globalization he makes clear the international implications of bank failures and stock market crashes the rise of derivatives and the catastrophic financial losses caused by Hurricane Katrina and the events of September 11

Public Governance in the Age of Globalization Karl-Heinz Ladeur, 2017-05-15 Globalization and its relationship to public governance is one of the key issues of our time In this book experts from a number of disciplines attempt to define what these two terms mean and perhaps even more importantly what they do not Taking as a starting point that globalization is neither the take over of political power by multi national stateless enterprises nor the chaotic unstructured process of dissolution of public order the contributors suggest that what is occurring is more institutionalized than many critics would admit It is argued that there are important transnational and supra national elements of a new public order which remain beyond the traditional borders of the state but not completely beyond the state as such Globalization as opposed to former

developments in the internationalization of the economy is characterized by its transnational form i.e. it is based on exchange processes which to a greater or lesser degree bypass both the state and the traditional international character of the world economy of the past
