Regulation And Deregulation Policy And Practice In The Utilities And Financial Services Industries:

Regulation and Deregulation Christopher McCrudden, 2007 *International Deregulation and Privatization* Christian Campbell, 2021-10-01 Issues vital to private investors from competition law to tax aspects are surveyed here by accountants and lawyers from throughout the EU The text shows the extent to which deregulation or liberalization of industrial sectors in the member states of the European Union EU has impacted beyond the economies and financial markets of Europe As more sectors of the European economy open to private participants the effect on the aviation rail insurance telecommunications and utilities sectors as this insightful text shows will continue to intensify dramatically Published under the Transnational Publishers imprint **Law, Infrastructure and Human Rights** Michael B. Likosky, 2006-10-30 From attacks on oil infrastructure in post war reconstruction Iraq to the laying of gas pipelines in the Amazon Rainforest through indigenous community villages infrastructure projects are sites of intense human rights struggles Many state and non state actors have proposed solutions for handling human rights problems in the context of specific infrastructure projects Solutions have been admired for being lofty in principle however they have been judged wanting in practice This book analyzes how human rights are handled in varied contexts and then assesses the feasibility of a common international institutional solution under the auspices of the United Nations to the alleged problem of the inability to translate human rights into practice Equal in Law, Unequal in Fact Timo Makkonen, 2012-01-06 An intriguing paradox characterises international and European action against discrimination On the one hand equality and the right to non discrimination are key human rights and protected by an impressive line of legal documents On the other hand empirical studies show that discrimination is still rampant today This book maps the gap between the rights and the reality and examines the causes consequences and extent of discrimination in Europe today as well as the international and European legal response to it On the basis of this analysis the study explains why anti discrimination law fails to deliver and what can be done about it The result is of interest to scholars students civil society politicians and anyone interested in equality and making it a reality **The Silicon Empire** Michael B. Likosky, 2018-01-18 Michael Likosky examines the continuities and discontinuities between colonial and present day high tech transnational legal orders His concern is specifically with the colonial characteristics of the legal order which underpins the global high tech economy He distinguishes the democratic and human rights rhetoric of this economy from a reality wherein the legal order is often used to reproduce colonial type relationships Just as in the colonial period the expansion of trans border commerce overlaps with democratic demands and human rights in complex multifaceted and paradoxical ways Through a case study looking at Malaysia s Multimedia Super Corridor a high tech national development plan and foreign direct investment scheme he examines how the transnational leaders of the high tech economy along with the Malaysian political elite react when human rights problems threaten to derail commercial plans *Controlling Market Power in Telecommunications* Damien Geradin, Michel Kerf, 2003 Controlling market power is a crucial issue in liberalised

telecommunications markets By comparatively analysing five countries this book explores how the regulatory framework should be designed

The Right to Do Wrong Mark Osiel,2019-02-25 Common morality in the form of shame outrage and stigma has always been society's first line of defense against ethical transgressions Social mores crucially complement the law Mark Osiel shows sparing us from oppressive formal regulation Much of what we could do we shouldn't and we don't We have a free speech right to be offensive but we know we will face outrage in response We may declare bankruptcy but not without stigma Moral norms constantly demand more of us than the law requires sustaining promises we can legally break and preventing disrespectful behavior the law allows Mark Osiel takes up this curious interplay between lenient law and restrictive morality showing that law permits much wrongdoing because we assume that rights are paired with informal but enforceable duties People will exercise their rights responsibly or else face social shaming For the most part this system has worked Social order persists despite ample opportunity for reprehensible conduct testifying to the decisive constraints common morality imposes on the way we exercise our legal prerogatives *The Right to Do Wrong* collects vivid case studies and social scientific research to explore how resistance to the exercise of rights picks up where law leaves off and shapes the legal system in turn Building on recent evidence that declining social trust leads to increasing reliance on law Osiel contends that as social changes produce stronger assertions of individual rights it becomes more difficult to depend on informal tempering of our unfettered freedoms Social norms can be indefensible Osiel recognizes But the alternative more repressive law is often far worse This empirically informed study leaves little doubt that robust forms of common morality persist and are essential to the vitality of liberal societies

Competition Law and Economic Regulation Niamh Dunne,2015-03-26 A nuanced assessment of the relationship between competition law and economic regulation focusing on substantive and policy oriented concerns *Regulating and Supervising Investment Services in the European Union* Y. Avgerinos,2003-05-14 This book provides an extensive and critical

assessment of the current regulatory and supervisory framework of investment services in the European Union EU and proposes alternative institutional structures Recent trends in financial services at EU level as well as regulatory and institutional developments at national level make the focus of this book very timely The book contributes to the debate by making specific suggestions with regard to the institutional structure and the operational sphere of a central pan European regulator
