Regulation And Macroeconomic Performance:

Regulation and Macroeconomic Performance Brian L. Goff, 1996-01-31 There are few aggregate measures of the amount of regulation in the macroeconomy despite the enormity of regulation and its macroeconomic consequences Regulation and Macroeconomic Performance attempts to increase the awareness of macroeconomic effects of regulation by providing some descriptions of regulation's scope and channels as well as providing quantitative assessments based on technical statistical evidence

Regulation and Macroeconomic Performance Norman V. Loayza, Ana Maria Oviedo, Luis Servén, 2012 Regulation is purportedly enacted to serve specific social purposes In reality however it follows a more complex political economy process where legitimate social goals are mixed with the objectives of particular interest groups Whatever its justification and objectives regulation can have potentially significant macroeconomic consequences by helping or hampering the dynamics of economic restructuring and resource reallocation that underlie the growth process This paper provides an empirical analysis of the macroeconomic impact of regulation It first characterizes the stylized facts on regulation across the world using a set of newly constructed comprehensive indicators of regulation in a large number of countries in the 1990s Using these indicators the paper studies the effects of regulation on economic growth and macroeconomic volatility employing cross country regression analysis In particular the paper considers whether the effects of regulation are affected by the country's level of institutional development Finally the analysis controls for the likely endogeneity of regulation with respect to macroeconomic performance The paper concludes that a heavier regulatory burden reduces growth and increases volatility although these effects are smaller the higher the quality of the overall institutional framework

Business Regulation and Economic Performance Norman V. Loayza, Luis Servén, 2010-01-11 The Schumpeterian process of creative destruction is an essential ingredient of a dynamic economy In many countries around the world however this process is weakened by pervasive regulation of product and factor markets This book documents the regulatory obstacles faced by firms particularly in developing countries and assesses their implications for firm renewal and macroeconomic performance Combining a variety of methodological approaches analytical and empirical micro and macroeconomic single and cross country the book provides evidence that streamlining the regulatory framework would have a significant social pay off particularly in developing countries that are also burdened by weak governance The book s chapters trace out analytically and empirically the links between microeconomic policies and distortions on the one hand and aggregate performance in terms of productivity growth and volatility on the other The volume adds to a novel but increasingly influential literature that seeks to understand macroeconomic phenomena from a microeconomic perspective and derive the relevant lessons for development policy Such literature is still fairly scarce in the case of industrial countries and virtually in its infancy for developing countries

Product Market Regulation and Macroeconomic Performance Fabio Schiantarelli, 2005 The main purpose of this paper is to provide a critical overview of the recent empirical contributions that use cross country data to study the effects of product market regulation and reform on a country s macroeconomic performance After a brief review of the theoretical literature and of relevant micro econometric evidence the paper discusses the main data and methodological issues related to empirical work on this topic It then critically evaluates the cross country evidence on the effects of product market regulation on mark ups firm dynamics investment employment innovation productivity and output growth The paper concludes with a summary of lessons learned from the econometric results

The Impact of Regulation on Growth and Informality Norman V. Loayza, Ana María Oviedo, Luis Servén, 2005

Assessing the Macroeconomic Impact of Structural Reforms The Case of Italy Ms. Lusine Lusinyan, Mr. Dirk Muir, 2013-01-24 Wide ranging structural reforms are underway in Italy aimed at addressing key bottlenecks in the product and labor markets Our analysis based on the IMF s Global Integrated Monetary and Fiscal model GIMF attempts to quantify the potential gains to the economy from a comprehensive package of structural reforms We find that these gains can be

sizeable While in most cases the reforms go in the right direction their impact would depend on effective and timely implementation In some areas especially in the labor market reforms would benefit from further strengthening The priorities should be to strengthen competition in the non tradable sector and make the labor market more efficient and inclusive supported by growth friendly fiscal reforms

Regulatory quality in Europe Claudio Radaelli, Fabrizio De Francesco, 2013-07-19 The European Union and its member states are investing in ambitious programmes for better regulation and targets of regulatory quality This book available in paperback for the first time lifts the veil of excessively optimistic propositions covering the whole better regulation agenda It provides an innovative conceptual framework to handle the political complexity of regulatory governance It approaches better regulation as an emerging public policy with its own political context actors problems rules of interaction instruments activities and impacts Focusing on the key tools of impact assessment consultation simplification and access to legislation the authors provide fresh empirical evidence on the progress made in the member states and in Brussels drawing on an extensive research project and an original survey of directors of better regulation programmes in Europe Radaelli and De Francesco show how indicators define measure and appraise better regulation policy linking measures to policy processes in which the stakeholders learn by monitoring Although better regulation is a top priority for competitiveness in Europe and the legitimacy of EU policy the level of commitment and the development of tools vary considerably The major challenge for better regulation is institutionalisation this calls for clear choices in terms of what the EU wants from better regulation Essential reading for academics political scientists lawyers and public economists and policy makers in charge of regulatory reforms in governments and international organisations

The Macroeconomics of Developing Countries Giovanni Andrea Cornia, 2020-03-26 The Macroeconomics of Developing Countries provides a comprehensive discussion of the exogenous factors and macroeconomic policies that affect the business cycle long term growth and distribution of income in developing countries It examines countries dependent on natural resources and affected by supply rigidities in agriculture They also feature dualistic markets a large informal sector rapid population growth a vulnerable export sector and chronic dependence on a volatile global finance The Macroeconomics of Developing Countries uses these examples to analyse the impact of stabilization and adjustment politics on growth inequality and poverty Despite the launch of the Sustainable Development Goals there is little consensus on how macroeconomic policies can be consistent with these objectives The Macroeconomics of Developing Countries demonstrates that a critical application of standard models to developing countries can generate erroneous results and induce the adoption of incorrect policy In order to address this it discusses the key structural differences between advanced and developing countries in order to justify the construction of alternative models
