Reimagining Textuality Textual Studies In The Late Age Of Print:

Reimagining Textuality Elizabeth Bergmann Loizeaux, Neil Fraistat, 2002 What happens when in the wake of postmodernism the old enterprise of bibliography textual criticism or scholarly editing crosses paths and processes with visual and cultural studies In *Reimagining Textuality* major scholars map out in this volume a new discipline drawing on and redirecting a host of subfields concerned with the production distribution reproduction consumption reception archiving editing and sociology of texts *Publishing Blackness* George Hutchinson, John Young, 2018-05-09 The first of its kind this volume sets in dialogue African Americanist and textual scholarship exploring a wide range of African American textual history and work *Genetic Criticism* Dirk Van Hulle, 2022-02-24 In *Genetic Criticism* Dirk Van Hulle introduces the study of creative processes to an Anglophone audience As a method in the study of literary writing processes genetic criticism is also a reading strategy The idea behind this book is to introduce this strategy to a broader audience from interested readers and graduate students to early career researchers and literary critics In literary studies it is often obvious that a particular work somehow seems to hit a nerve but more challenging to pinpoint exactly why it works This book therefore starts from a clear basic assumption knowing how something was made can help us understand how and why it works This strategy is at the basis of many disciplines including art history By means of X ray technology or hyperspectral imaging it is possible to look at a painting as a multilayered object with not only spatial dimensions but also a temporal one This temporal dimension is the core of the reading strategy introduced in this book Note books marginalia manuscripts and typescripts even if one works with scans give a concrete dimension to literature which is a helpful reading strategy for many students On the one hand this involves concrete transferrable skills such as aspects of transcription and digital scholarly editing On the other hand it also involves more abstract theoretical issues relating to matters of authorship collaboration authority agency intention and intertextuality *Introduction to Scholarship in Modern Languages and Literatures* David G. Nicholls, 2015-01-01 The third edition of the MLA s widely used *Introduction to Scholarship in Modern Languages and Literatures* features sixteen new essays by leading scholars Designed to highlight relations among languages and forms of discourse the volume is organized into three sections *Understanding Language* provides an overview of the field of linguistics with special attention to language acquisition and the social life of languages *Forming Texts* offers tools for understanding how speakers and writers shape language it examines scholarship in the distinct but interrelated fields of rhetoric composition and poetics *Reading Literature and Culture* continues the work of the first two sections by introducing major areas of critical study The nine essays in this section cover textual and historical scholarship interpretation comparative cultural and translation studies and the interdisciplinary topics of gender sexuality race and migrations among others As in previous volumes an epilogue examines the role of the scholar in contemporary society Each essay discusses the significance underlying assumptions and limits of an important field of inquiry traces the historical development of its subject introduces key terms outlines modes of research

now being pursued postulates future developments and provides a list of suggestions for further reading This book will interest any member of the academic community seeking a review of recent scholarship while it provides an indispensable resource for undergraduate and graduate students of modern languages and literatures *Supporting Digital Humanities for Knowledge Acquisition in Modern Libraries* Sacco, Kathleen L.,2015-06-25 Digital Humanities is a burgeoning field of research and education concerned with the intersection of technology and history philosophy linguistics literature music cultural studies and the arts Supporting Digital Humanities for Knowledge Acquisition in Modern Libraries aims to stand at the forefront of this emerging discipline targeting an audience of researchers and academicians with a special focus on the role of libraries and library staff In addition to a collection of chapters on crucial issues surrounding the digital humanities this volume also includes a fascinating account of the painstaking restoration efforts surrounding a 110 year old handwritten historical source document the results of which never before published on this scale culminate in a full color 70 page photographic reproduction of the 1904 Diary of Anna Clift Smith *The Cambridge Companion to Ulysses* Sean Latham,2014-10-27 Few books in the English language seem to demand a companion more insistently than James Joyce s *Ulysses* a work that at once entices and terrifies readers with its interwoven promises of pleasure scandal difficulty and mastery This volume offers fourteen concise and accessible essays by accomplished scholars that explore this masterpiece of world literature Several essays examine specific aspects of *Ulysses* ranging from its plot and characters to the questions it raises about the strangeness of the world and the density of human cultures Others address how Joyce created this novel why it became famous and how it continues to shape both popular and literary culture Like any good companion this volume invites the reader to engage in an ongoing conversation about the novel and its lasting ability to entice rankle absorb and enthrall *Always Already New* Lisa Gitelman,2008-08-29 In *Always Already New* Lisa Gitelman explores the newness of new media while she asks what it means to do media history Using the examples of early recorded sound and digital networks Gitelman challenges readers to think about the ways that media work as the simultaneous subjects and instruments of historical inquiry Presenting original case studies of Edison s first phonographs and the Pentagon s first distributed digital network the ARPANET Gitelman points suggestively toward similarities that underlie the cultural definition of records phonographic and not at the end of the nineteenth century and the definition of documents digital and not at the end of the twentieth As a result *Always Already New* speaks to present concerns about the humanities as much as to the emergent field of new media studies Records and documents are kernels of humanistic thought after all part of and party to the cultural impulse to preserve and interpret Gitelman s argument suggests inventive contexts for humanities computing while also offering a new perspective on such traditional humanities disciplines as literary history Making extensive use of archival sources Gitelman describes the ways in which recorded sound and digitally networked text each emerged as local anomalies that were yet deeply embedded within the reigning logic of public life and public memory In the end Gitelman turns to the
