Reinventing Public Education:

Reinventing Public Education Paul Hill, Lawrence C. Pierce, James W. Guthrie, 2009-02-15 A heated debate is raging over our nation's public schools and how they should be reformed with proposals ranging from imposing national standards to replacing public education altogether with a voucher system for private schools. Combining decades of experience in education, the authors propose an innovative approach to solving the problems of our school system and find a middle ground between these extremes. *Reinventing Public Education* shows how contracting would radically change the way we operate our schools while keeping them public and accessible to all and making them better able to meet standards of achievement and equity. Using public funds, local school boards would select private providers to operate individual schools under formal contracts specifying the type and quality of instruction. In a hands-on, concrete fashion, the authors provide a thorough explanation of the pros and cons of school contracting and how it would work in practice. They show how contracting would free local school boards from operating schools so they can focus on improving educational policy, how it would allow parents to choose the best school for their children, and finally how it would ensure that schools are held accountable and academic standards are met. While retaining a strong public role in education, contracting enables schools to be more imaginative, adaptable, and suited to the needs of children and families. In presenting an alternative vision for America's schools, *Reinventing Public Education* is too important to be ignored. [Reinventing Public Education](#) Paul Thomas Hill, 1994

Reinventing America's Schools David Osborne, 2017-09-05 From David Osborne, the author of *Reinventing Government*, a biting analysis of the failure of America's public schools and a comprehensive plan for revitalizing American education. In *Reinventing America's Schools*, David Osborne, one of the world's foremost experts on public sector reform, offers a comprehensive analysis of the charter school movements and presents a theory that will do for American schools what his New York Times bestseller *Reinventing Government* did for public governance in 1992. In 2005, when Hurricane Katrina devastated New Orleans, the city got an unexpected opportunity to recreate their school system from scratch. The state's Recovery School District (RSD) created to turn around failing schools gradually transformed all of its New Orleans schools into charter schools, and the results are shaking the very foundations of American education. Test scores, school performance scores, graduation and dropout rates, ACT scores, college-going rates, and independent studies all tell the same story: the city's RSD schools have tripled their effectiveness in eight years. Now other cities are following suit with state governments reinventing failing schools in Newark, Camden, Memphis, Denver, Indianapolis, Cleveland, and Oakland. In this book, Osborne uses compelling stories from cities like New Orleans and lays out the history and possible future of public education. Ultimately, he uses his extensive research to argue that in today's world, we should treat every public school like a charter school and grant them autonomy, accountability, diversity of school designs, and parental choice.
