Religious Ethics A Systems Approach:

Religious Ethics James F. Smurl, 1971 *A Bibliographic Guide to the Comparative Study of Ethics* John Braisted Carman, Mark Juergensmeyer, William Darrow, 1991-04-26 This bibliography is the culmination of four years work by a team of noted scholars its annotated entries are organised by religious tradition and cover each tradition s central concepts offering a judicious selection of primary and secondary works as well as recommendations of cross cultural topics to be explored Specialists in the history and literature of religions and comparative religion will find this bibliography a valuable research tool *The Moral Quest* Stanley J. Grenz, 2016-09-27 Stanley J Grenz masterfully leads readers into a theological engagement with moral inquiry that is a first rate introduction to Christian ethics [Black Womanist Ethics](#) Katie G. Cannon, 2006-02-09 This study articulates the distinctive moral character of the Afro American women s community Beginning with a reconstructive history of the Afro American woman s situation in America the work next traces the emergence of the Black woman s literary tradition and explains its importance in expressing the moral wisdom of Black women The life and work of Zora Neale Hurston is examined in detail for her unique contributions to the moral tradition of the Afro American woman A final chapter initiates a promising exchange between the works of Hurston and those of Howard Thurman and Martin Luther King Jr A pioneering and multi dimensional work Black Womanist Ethics is at once a study in ethics gender and race

Explorations In Global Ethics Sumner B Twiss, 2018-03-08 Inspired by the 1993 Parliament of the Worlds Religions this volume for the first time brings the scholarly discipline of comparative religious ethics into constructive collaboration with the community of interreligious dialogue The contributors draw from both communities of discourse in addressing questions of method and theory and global moral issues such as human rights distributive justice politics of war international business the environment and genocide in a cross cultural context Inspired by the 1993 Parliament of the Worlds Religions this volume for the first time brings the scholarly discipline of comparative religious ethics into constructive collaboration with the community of interreligious dialogue Its design is premised on two important insights First interreligious dialogue offers to comparative religious ethics a new more persuasive rationale agenda of issues and practical orientation Second comparative religious ethics offers to interreligious dialogue an arsenal of critical tools and methods which will enhance the sophistication of its practical work In this way both theory a dominant concern and strength of comparative religious ethics and praxis a dominant concern and strength of interreligious moral dialogue are joined together in mutual effort each contributing to the benefit of the other The volumes contributors share this vision of collaboration drawing explicitly from both communities of discourse in a manner that crosses disciplinary and professional boundaries to deal creatively and constructively with important methodological and global moral issue Although theory and practice cannot easily be separated in such a collaborative project for the purpose of clarity the volume is divided into two main parts The first specifically engages questions of method theory and the social role of the public intellectual the second

on substantive moral themes and issues many of which were raised at the 1993 Parliament Taken together the volumes essays articulate and illustrate new ways of approaching contemporary moral concerns cross culturally yet with a rigor appropriate to our complex and pluralistic world **Understanding Religious Abuse and Recovery** Patrick J.

Knapp,2021-04-21 Currently there are at least four major identifiable perspectives on how people best understand and recover from religious abuse Both secular and faith based Christian adherents can be variously identified in each of these approaches This book examines these viewpoints and evaluates their various strengths and limitations It concludes that each perspective is helpful to the extent possible given the limitations of its respective philosophic or theological assumptions This book summarizes each viewpoint and suggests a larger contextual perspective helpful to better understand involvement in and recovery from religiously abusive environments The conclusion is an integration of the various conceptual frameworks and a different model SECURE is described that includes essential principles and practical strategies necessary for recovery from religious abuse Suggestions are made for future research and study both for academics with interest in the cultic studies and counseling fields and for various people negatively affected by religious abuse and in need of recovery

Restored to Earth Gretel Van Wieren,2013-07-09 Ecological restoration integrates the science and art of repairing ecosystems damaged by human activities Despite relatively little attention from environmental ethicists restoration projects continue to gain significance drawing on citizen volunteers and large amounts of public funds providing an important model of responding to ecological crisis Projects range from the massive multi billion dollar Kissimmee River project restoring 25 000 acres of Everglades wetlands to the 30 million effort to restore selected wetlands in industrial Brownfield sites in Chicago s south side Lake Calumet area to the reintroduction of tall grass prairie ecosystems in various communities in the Midwest Restored to Earth provides the first comprehensive examination of the religious and ethical dimensions and significance of contemporary restoration practice an ethical framework that advances the field of environmental ethics in a more positive action oriented experience based direction Van Wieren brings together insights and examples from restoration ecology environmental ethics religious studies and conservation and Christian thought as well as her own personal experiences in ecological restoration to propose a new restoration ethic grounded in the concrete hands on experience of humans working as partners with the land Mysticism and Morality Richard H. Jones,2004-01-01 In Mysticism and Morality author Richard Jones explores an often neglected question of religious ethics Is mysticism moral Through a discussion of several religious traditions including Hinduism Jainism Buddhism Tantrism Daoism and Christianity Jones fills a major void in the scholarly literature by considering all relevant points pertaining to mysticism Rather than looking at mysticism abstractly the book focuses on such topics as ritual practice and the processes of mystical becoming This work provides new perspectives for those interested in ethics and will prove essential to anyone interested in comparative philosophy and cross cultural studies of religion

Veatch,2004-09-16 Medical ethics changed dramatically in the past 30 years because physicians and humanists actively engaged each other in discussions that sometimes led to confrontation and controversy but usually have improved the quality of medical decision making Before then medical ethics had been isolated for almost two centuries from the larger philosophical social and religious controversies of the time There was however an earlier period where leaders in medicine and in the humanities worked closely together and both fields were richer for it This volume begins with the 18th century Scottish Enlightenment when professors of medicine such as John Gregory Edward Percival and the American Benjamin Rush were close friends of philosophers like David Hume Adam Smith and Thomas Reid They continually

exchanged views on matters of ethics with each other in print at meetings of elite intellectual groups and at the dinner table. Then something happened: physicians and humanists quit talking with each other. In searching for the causes of the collapse, this book identifies shifts in the social class of physicians, developments in medical science and changes in the patterns of medical education. Only in the past three decades has the dialogue resumed as physicians turned to humanists for help just when humanists wanted their work to be relevant to real life social problems. Again the book asks why finding answers in the shift from acute to chronic disease as the dominant pattern of illness, the social rights revolution of the 1960s and the increasing dissonance between physician ethics and ethics outside medicine. The book tells the critical story of how the breakdown in communication between physicians and humanists occurred and how it was repaired when new developments in medicine together with a social revolution forced the leaders of these two fields to resume their dialogue.

Bernard Lonergan's Method and a Medical Doctor's Approach to Healthcare John Raymaker, 2021-03-10 Pat Daly MD has written a series of articles which uphold Bernard Lonergan's method explored in his famous book *Insight* as a model that could be followed or applied in practicing medicine or promoting healthcare. Daly calls his effort a GEM Model for medicine. Daly however has not explored in depth Lonergan's second major work *Method in Theology* which develops an eight step method that complements *Insight*. This book focuses on these eight steps or Functional Specialties so as to better promote Lonergan's views on Healing and Creating in History.

Morphogenesis of Symbolic Forms: Meaning in Music, Art, Religion, and Language Wolfgang Wildgen, 2023-03-01 In the present book the starting line is defined by a morphogenetic perspective on human communication and culture. The focus is on visual communication, music, religion, myth and language, i.e. on the symbolic forms at the heart of human cultures.

Ernst Cassirer: The term morphogenesis has more precisely the meaning given by Ren Thom 1923-2002 in his book *Morphogenesis and Structural Stability* 1972 and the notions of self organization and cooperation of subsystems in the *Synergetics* of Hermann Haken 1927. The naturalization of communication and cultural phenomena is the favored strategy but the major results of the involved disciplines: art history, music theory, religious science and linguistics are respected. Visual art from the Paleolithic to modernity stands for visual communication. The present book focuses on studies of classical painting and sculpture, e.g. Leonardo da Vinci, William Turner and Henry Moore and modern art, e.g. Jackson Pollock and Joseph Beuys. Musical morphogenesis embraces classical music from J.S. Bach to Arnold Schöenberg and political songwriting Bob Dylan, Leonard Cohen. The myths of pre-literary societies show the effects of self organization in the re-assembly/bricolage of traditions. Classical polytheistic and monotheistic religions demonstrate the unfolding of basic germs, religious attractors and their reduction in periods of crisis, the self organization of complex religious networks and rationalized macro structures in theologies. Significant tendencies are analyzed in the case of Buddhism and Christianity. Eventually a holistic view of symbolic communication and human culture emerges based on state of the art in evolutionary biology, cognitive science, linguistics and semiotics, philosophy of symbolic forms.

Christian Ethics Russell A.

Morris,2015-08-14 Within the Christian community at large there is often little correlation between scriptural guidelines for Christian living and the lifestyle practices and behavior of believers Christian social scientist George Barna has done extensive research in this area that reveals alarming data For example nearly nine of ten adults state that religious faith is very important in their lives However only one in five adults claims that the Bible is the dominant influence in their decisions regarding lifestyle practices Further research suggests that there is often little difference between the lifestyle practices of Christians and non Christians This nominal difference in lifestyle practices and behavior between Christians and non Christians as well as the minimal correlation between Scripture and practice among many Christians produced an interest in this area of practical theology Serving as a Christian pastor over the past two decades the reality of Barnas research has been observed personally The biblical parallel of the prevailing apathy within todays churches is seen in Judges 21 25 NASB In those days there was no king in Israel everyone did what was right in his own eyes That is in those days there was no accepted standard of truth Likewise only one in four American adults believes in the existence of absolute truth As a result the relationship between doctrine and practice belief and behavior is often minimal with many Christians doing only what is right in their own eyes rather than allowing Gods Word to influence their mode of living A distinct relationship between belief and behavior is seen in I Timothy 4 16 In this passage Paul clearly identifies a correlation between what one believes doctrine and the lifestyle behavior one lives when he writes Watch your life and doctrine closely Persevere in them because if you do you will save both yourself and your hearers From this verse it is clear that there are two areas in the life of the Christian that need to be scrutinized and pursued namely belief and behavior The fundamental thesis of this book is that a deeper understanding of Christian ethics will inform and facilitate the Christian life
