Remapping Global Politics History's Revenge And Future Shock Cambridge Studies In International Relations:

Remapping Global Politics Yale H. Ferguson, Richard W. Mansbach, 2004-11-11 This book seeks to redraw our mental maps of global politics and to explain the shifting and accelerating forces that are shaping those maps The authors build on the concept of post internationalism focusing primarily on political space and political identity which they argue are the new frontiers of global political theory They suggest that the state is losing capacity legitimacy and authority to remain the primary actor in world affairs and is giving way to a more complex post international universe characterized by diverse and overlapping polities This book is the result of the authors long standing joint research into the nature and dynamics of global politics a collaboration that has spanned over three decades It makes an important contribution to the literatures on globalization and the future of international relations theory

International Relations and the Problem of Time Andrew R. Hom, 2020 This book develops a novel approach to the issue of time s widespread but poorly understood influence on the study of international politics

International Relations Stephanie Lawson, 2012-03-12 International Relations emerged as a distinct academic discipline in the early twentieth century as scholars and practitioners sought to address the causes of war and conditions for peace in a systematic and sustained way Its philosophic foundations however draw on centuries of thinking about human nature political authority and obligation justice and injustice and their implications for relations within and between political communities Since then IR has become one of the most important and dynamic fields of academic study in the contemporary period In this second edition Stephanie Lawson retains a broad historical and contextual approach in introducing readers to the central themes and theoretical perspectives while also addressing key

concerns in the contemporary period These include the emergence of states and empires theories ranging from classical realism and liberalism to postcolonial and green theory twentieth century international history security and insecurity global governance and world order international political economy globalization and the prospects for a postinternational world Written in an accessible narrative style this book will appeal to students at undergraduate level and beyond including those undertaking postgraduate coursework study in IR with little or no previous academic training in the field *Ideas, Interests and Foreign Aid* A. Maurits van der Veen, 2011-09-01 Why do countries give foreign aid Although many countries have official development assistance programs this book argues that no two of them see the purpose of these programmes in the same way Moreover the way countries frame that purpose has shaped aid policy choices past and present The author examines how Belgium long gave aid out of a sense of obligation to its former colonies The Netherlands was more interested in pursuing international influence Italy has focused on the reputational payoffs of aid flows and Norwegian aid has had strong humanitarian motivations since the beginning But at no time has a single frame shaped any one country's aid policy exclusively Instead analysing half a century of legislative debates on aid in these four countries this book presents a unique picture both of cross national and over time patterns in the salience of different aid frames and of varying aid programmes that resulted After Defeat Ayşe Zarakol, 2010-12-23 Not being of the West being behind the West not being modern enough not being developed or industrialized secular civilized Christian transparent or democratic these descriptions have all served to stigmatize certain states through history Drawing on constructivism as well as the insights of social theorists and philosophers *After Defeat* demonstrates that stigmatization in international relations can lead to a sense of national shame as well as auto Orientalism and inferior status Ayşe Zarakol argues that stigmatized states become extra sensitive to concerns about status and shape their foreign policy accordingly The theoretical argument is supported by a detailed historical overview of central examples of the established outsider dichotomy throughout the evolution of the modern states system and in depth studies of Turkey after the First World War Japan after the Second World War and Russia after the Cold War **A Poststructuralist Discourse Theory of Global Politics** Dirk Nabers, 2015-10-07 This book develops a discourse theory of crisis and change in global politics Crisis is conceptualized as structural dislocation resting on difference and incompleteness Change is seen as the continuous but ultimately futile effort to gain a full identity The incompleteness and contingent character of the social represents the most important condition for democratic politics to become possible and for a theory of crisis and change to become conceivable In this new understanding crisis loses its everyday meaning of a periodically occurring event Instead crisis becomes an omnipresent feature of the social fabric It represents the absence of ground of social foundation and it rests within the subject as well as within the social whole *From the Ashes of History* Adam B. Lerner, 2022 In recent years calls for reparations and restorative justice alongside the rise of populist grievance politics have demonstrated the stubborn resilience of traumatic memory From the transnational Black Lives Matter movement's calls for

reckoning with the legacy of slavery and racial oppression to continued efforts to secure recognition of the Armenian genocide or Imperial Japan's human rights abuses international politics is replete with examples of past violence reasserting itself in the present But how should scholars understand trauma's long term impacts Why do some traumas lie dormant for generations only to surface anew in pivotal moments And how does trauma scale from individuals to larger political groupings like nations and states shaping political identities grievances and policymaking In *From the Ashes of History* Adam B Lerner looks at collective trauma as a foundational force in international politics a shock to political cultures that can constitute new actors and shape decision making over the long term As Lerner shows uncovering collective trauma's role in international politics is vital for two key reasons First it can help explain longstanding tensions between groups an especially relevant topic as scholars examine the transnational resurgence of nationalism and populism Second it pushes the discipline of International Relations to more completely account for mass violence's true long term costs particularly as they become embedded in longstanding structural inequalities and injustices While IR scholarship has largely dismissed non systematic latent phenomena like trauma Lerner argues that collective trauma can help draw the lines between international political groups and frame the logics of international political action Drawing on three historical cases that uncover the impact of collective trauma in Indian Israeli and American foreign policymaking *From the Ashes of History* demonstrates the broad utility of collective trauma as a theoretical lens for investigating how mass violence's legacy can resurge and dissipate over time

The Privatized Military Industry from a Postinternational Perspective Harald Löberbauer, 2007-07 Seminar paper from the year 2007 in the subject Politics International Politics General and Theories grade 1 Diplomatic Academy of Vienna School of International Studies course Postinternational Politics 72 Literaturquellen 8 Internetquellen entries in the bibliography language English abstract The Privatized Military Industry PMI definitely is on the rise as P W Singer argued in 2004 In international relations scholarship numerous research is available on this topic since the PMI started its rise during the 1990s After having identified a rather new phenomenon in world politics the process of the politicization and analytical analysis follows drawing a comparison to a policy analysis approach Doing research on private actors in world politics offering services falling within the military domain from a postinternational perspective is a rather new thing Most researchers analyze the PMI as such their institutional design their organization and classify them according to the services they offer This research is based on a different approach It analyzes the implications of the PMI to the Westphalian state and state system by referring to postinternationalism as a worldview What constitutes the postinternational worldview and what indicators I will use based on this worldview is explained in part II dealing with theory Theory in this paper in principle can be summed up with the phrase that the Westphalian state as such is declining in power and that private actors in our case private military actors such as TNCs or NGOs are becoming more important and powerful Some gain and some lose From this perspective it is the states that lose and the private actors that gain

Mercenaries and Security Contractors in the

21st Century Eugenio Cusumano, Christopher Kinsey, Robert Parr, 2025-03-31 This book examines the debate over private security contractors using historical and contemporary cases including several non Western examples Since the end of the Cold War security privatization has grown in its geographical outreach breadth and scope This pervasive expansion of the private military and security market warrants a systematic investigation of commercial actors involvement in the variety of tasks associated with the provision of violence ranging from combat to vessel protection and cybersecurity Combining theoretical and empirical approaches the essays in this volume provide a historical investigation into private force that extends beyond Europe and the United States By focusing on recent developments such as the extensive involvement of Russian mercenaries in Ukraine new evidence from the Global South and the added historical depth given to the study of commercial providers of warfare this volume questions the endurance of norms like the mercenary taboo and the state monopoly of violence In doing so it sheds new light on the past present and future of private security This book will be of much interest to students of private security studies military studies security studies and international relations

Central Banking as Global Governance Rodney Bruce Hall, 2008-12-04 Money is a social convention but with what social consequences In this innovative study Rodney Bruce Hall argues that those who govern the parameters of money's creation its destruction and its valuation are responsible for the governance of international finance The volume is an analysis of central banking as global governance employing the institutional philosophy of John Searle as a theoretical basis for exploring the consequences of money as a social institution and the social relations of credit and debt While previous studies in this field have made forays into the political economy of monetary institutions this book breaks new ground by offering a constructivist social analysis that identifies the mechanisms of governance as social rather than material processes The volume will therefore be of great interest to a wide range of scholars and students particularly those with an interest in international relations international finance and international political economy

Rethinking the 21st Century Doctor Amy Eckert, Laura Sjoberg, 2013-07-04 Rethinking the 21st Century brings much needed context and perspective to the security problems we face today In recent years the Bush Doctrine that the security threats we now face are entirely unprecedented has echoed around the world Global security and stability is now challenged not only by states and nuclear war but by insurgency disease environmental degradation and military privatisation Yet this creates a deep sense of disconnect in the way we perceive politics and can be dangerously stark and ahistorical The chapters here show that far from being a clean break the new problems faced today might actually have old solutions What can Locke tell us about terrorists What does Bentham have to say about sanctions What are the ethics of outsourcing war to private companies By looking back to decades and even centuries of ethical analysis and political theory this book provides fascinating insight into all these questions

Advances in Industrial and Labor Relations David Lewin, Bruce E. Kaufman, Paul J. Gollan, 2011-05-11 Contains distinctive papers that explore important aspects of contemporary employment relationships some on micro level in

orientation whereas others are more macro oriented This title deals with topics such as the dual alignment of industrial relations activity in terms of strategic choice and mutual gains and more **The Dragon's Hidden Wings** Sheng Ding, 2008-01-01 The Dragon's Hidden Wings is the first comprehensive study on China's use of soft power Sheng Ding provides the reader with an insightful empirical study that details China's economic and political rise on the global scene over the course of the last three decades This book not only endeavors to examine the connections between the ongoing rise of China and what Joseph Nye defines as soft power but also attempts to give readers a more complete understanding of China's national power and modernization process The main questions addressed are What are the theoretical and empirical connections between the soft power concept and the rise of China What are China's own soft power resources How has Beijing used soft power to become a major player in the world What opportunities and challenges does the use of soft power present to China This study is essential reading for scholars of Chinese politics and foreign policy and for scholars of international relation interested in the concept and application of soft power *International Governance, Regimes, and Globalization* Peter Kien-hong Yu, Emily W. Chow, Shawn S.F. Kao, 2010-04-27 In this collection International Governance Regimes and Globalization the writers explore international relations and globalization by using specific examples from Beijing and Taipei In December 1949 when China was politically divided the People's Republic of China PRC central government was in control of most resources tangible and intangible For that reason our unit of analysis has to be the state meaning a government or a politically organized body With the rise of civil society at both national and international levels applying the international global governance theory should be closer to reality because we have to look at both the state and non state sponsored dimensions which are more complex and complicated Indeed international global governance could become a new school of thought and will continue to expand as academics explore For example neo liberalism primarily focuses on market and contract When people buy and sell something they are in a market In other words politics is the superstructure of economics or as Karl Marx said what prevails in economy will ultimately prevail in politics In a sense subscribers to this school of thought are Marxian However the study of international global governance embraces the non state sponsored dimension Hence it is broader than that of the neo liberalism school of thought The SAGE Handbook of the History, Philosophy and Sociology of International Relations Andreas Gofas, Inanna Hamati-Ataya, Nicholas Onuf, 2018-07-30 The SAGE Handbook of the History Philosophy and Sociology of International Relations offers a panoramic overview of the broad field of International Relations by integrating three distinct but interrelated foci It retraces the historical development of International Relations IR as a professional field of study explores the philosophical foundations of IR and interrogates the sociological mechanisms through which scholarship is produced and the field is structured Comprising 38 chapters from both established scholars and an emerging generation of innovative meta theorists and theoretically driven empiricists the handbook fosters discussion of the field from the inside out forcing us to come to grips

with the widely held perception that IR is experiencing an existential crisis quite unlike anything else in its hundred year history This timely and innovative reference volume reflects on situated scholarly practices in a way that projects our collective thinking into the future PART ONE THE INWARD GAZE INTRODUCTORY REFLECTIONS PART TWO IMAGINING THE INTERNATIONAL ACKNOWLEDGING THE GLOBAL PART THREE THE SEARCH FOR AN IDENTITY PART FOUR INTERNATIONAL RELATIONS AS A PROFESSION PART FIVE LOOKING AHEAD THE FUTURE OF META ANALYSIS

Norm Diffusion and HIV/AIDS Governance in Putin's Russia and Mbeki's South Africa Vlad Kravtsov, 2015-07-15 Although adopting global norms often improves domestic systems of governance domestic obstacles to norm diffusion are frequent States that decide to reinvent their political authority simultaneously evaluate which current global norms are desirable and to what extent In this study Vlad Kravtsov argues that recent debates about the nature of authority in Putin's Russia and Mbeki's South Africa have resulted in a set of unique ideas on the cardinal goals of the state This is the first book to explore how these consensual ideas have shaped health governance and impinged on norm diffusion processes Detailed comparisons of HIV AIDS governance systems in Russia and South Africa illustrate the argument The Kremlin's dislike of international recommendations stemmed from the rapidly maturing statism and great power syndrome Pretoria's responses to global AIDS norms were consistent with the ideas of the African Renaissance which highlighted indigenism market based empowerment and moral leadership in global affairs This book explains how and why the governments under investigation framed the nature of the epidemic provided evidence based prevention services increased universal access to proven lifesaving medicines and interacted with other participants in social practice

Territory, Globalization and International Relations J. Strandsbjerg, 2010-10-27 Globalization and changes to statehood challenge our understanding of space and territory This book argues that we must understand that both the modern state and globalisation are based on a cartographic reality of space In consequence claims that globalization represents a spatial challenge to state territory are deeply problematic

Trust in International Cooperation Brian C. Rathbun, 2011-12-01 Trust in International Cooperation challenges conventional wisdoms concerning the part which trust plays in international cooperation and the origins of American multilateralism Brian C Rathbun questions rational institutionalist arguments demonstrating that trust precedes rather than follows the creation of international organizations Drawing on social psychology he shows that individuals placed in the same structural circumstances show markedly different propensities to cooperate based on their beliefs about the trustworthiness of others Linking this finding to political psychology Rathbun explains why liberals generally pursue a more multilateral foreign policy than conservatives evident in the Democratic Party's greater support for a genuinely multilateral League of Nations United Nations and North Atlantic Treaty Organization Rathbun argues that the post World War Two bipartisan consensus on multilateralism is a myth and differences between the parties are growing continually starker
