Renaissance Architecture:

Renaissance Architecture Christy Anderson, 2013-02-28 The Renaissance was a diverse phenomenon marked by innovation and economic expansion the rise of powerful rulers religious reforms and social change Encompassing the entire continent Renaissance Architecture examines the rich variety of buildings that emerged during these seminal centuries of European history Although marked by the rise of powerful individuals both patrons and architects the Renaissance was equally a time of growing group identities and communities and architecture provided the public face to these new identities Religious reforms in northern Europe spurred on by Martin Luther rejected traditional church function and decoration and proposed new models Political ambitions required new buildings to satisfy court rituals Territory nature and art intersected to shape new landscapes and building types Classicism came to be the international language of an educated architect and an ambitious patron drawing on the legacy of ancient Rome Yet the richness of the medieval tradition continued to be used throughout Europe often alongside classical buildings Examining each of these areas by turn this book offers a broad cultural history of the period as well as a completely new approach to the history of Renaissance architecture The work of well known architects such as Michelangelo and Andrea Palladio is examined alongside lesser known though no less innovative designers such as Juan Guas in Portugal and Benedikt Ried in Prague and Eastern Europe Drawing on the latest research it also covers more recent areas of interest such as the story of women as patrons and the emotional effect of Renaissance buildings as well as the impact of architectural publications and travel on the emerging new architectural culture across Europe As such it provides a compelling introduction to the subject for all those interested in the history of architecture society and culture in the Renaissance and European culture in general **Studies in Italian Renaissance Architecture** Wolfgang Lotz, 1977

Building Renaissance Venice Richard John Goy, 2006-01-01 This book brings to life the story of the construction of some of the most outstanding early Renaissance buildings in Venice Through a series of individual case studies Richard J Goy explores how and why great buildings came to be built He addresses the practical issues of constructing such buildings as the Torre dell Orologio in Piazza San Marco the Arsenale Gate and the churches of Santa Maria della Carita and San Zaccaria focusing particular attention on the process of patronage The book is the first to trace the complete process of creating important buildings from the earliest conception in the minds of the patrons the Venetian state or other institutional patrons through the choice of architect the employment of craftsmen and the selection of materials In an interesting analysis of the participants roles Goy highlights the emerging importance of the superintending master the protomaestro **Italian Renaissance Architecture** Henry A. Millon, 1996 These essays consider both architecture and urban planning in late medieval and Renaissance Italy and French and German Renaissance architecture stage designs and the relationship of architecture with the other arts The works are analyzed historically from the viewpoint of both the humanist Renaissance theories and of modern critical reappraisals Reproducing and describing numerous designs projects and manuscripts by
