Ferguson, 1984 The role of religion in early American literature has been endlessly studied the role of the law has been virtually ignored Robert A Ferguson's book seeks to correct this imbalance With the Revolution Ferguson demonstrates the lawyer replaced the clergyman as the dominant intellectual force in the new nation Lawyers wrote the first important plays novels and poems as gentlemen of letters they controlled many of the journals and literary societies and their education in the law led to a controlling aesthetic that shaped both the civic and the imaginative literature of the early republic An awareness of this aesthetic enables us to see works as diverse as Jefferson's Notes on the State of Virginia and Irving's burlesque History of New York as unified texts products of the legal mind of the time The Declaration of Independence the Constitution and the great political orations were written by lawyers and so too were the literary works of Trumbull Tyler Brackenridge Charles Brockden Brown William Cullen Bryant Richard Henry Dana Jr and a dozen other important writers To recover the original meaning and context of these writings is to gain new understanding of a whole era of American culture The nexus of law and letters persisted for more than a half century Ferguson explores a range of factors that contributed to its gradual dissolution the yielding of neoclassicism to romanticism the changing role of the writer the shift in the lawyer's stance from generalist to specialist and from ideological spokesman to tactician of compromise the onslaught of Jacksonian democracy and the problems of a country torn by sectional strife At the same time he demonstrates continuities with the American Renaissance And in Abraham Lincoln he sees a memorable late flowering of the earlier tradition **The Yale Biographical Dictionary of American Law** Roger K. Legal Publishing in Antebellum America M. H. Hoeflich,2010-04-26 Legal Publishing in Antebellum America presents a history of the law book publishing and distribution industry in the United States Part business history part legal history part history of information diffusion M H Hoeflich shows how various developments in printing and bookbinding the introduction of railroads and the expansion of mail service contributed to the growth of the industry from an essentially local industry to a national industry Furthermore the book ties the spread of a particular approach to law that is the scientific approach championed by Northeastern American jurists to the growth of law publishing and law book selling and shows that the two were critically intertwined *Conservatism* Jerry Z. Cords of Affection Emily Pears,2022-01-05 In Cords of Affection Constructing Constitutional Union in Early American History Emily Pears investigates efforts by the founding generation s leadership to construct and strengthen political attachments in and among the citizens of the new republic These emotional connections between citizens and their institutions were critical to the success of the new nation The founders recognized that attachments do not form automatically and require constant tending Emily Pears defines and develops a theory of political attachments based on an analysis of the approaches used in the founding era In particular she identifies three methods of political attachment a utilitarian method a cultural method and a participatory method Cords of Affection offers a comparative analysis of the theories and projects undertaken by a wide array of political leaders in the early republic and antebellum periods that

exemplify each of the three methods The work includes new historical analysis of the implementation of projects of nationalism and attachment ranging from data on federal funding for internal improvements to analysis of Whig orations In Cords of Affection Emily Pears offers lessons from history about the strengths weaknesses and pitfalls of various approaches to constructing national political attachments Twenty first century Americans attachments to their national government have waned While there are multiple narratives of this decline they all have the same core element a citizenry unwilling to uphold the norms and institutions of American democracy in the face of challenge When a demagogue or a populist movement or a foreign power threatens action that undermines American democracy citizens will not come to its defense Citizens cheer their own side regardless of the means it uses or they are simply apathetic to the role that institutions and institutional constraints play in keeping us all free and equal At worst Americans have come to regard their inherited constitutional foundations as unjust biased or ill equipped for the modern world and the notion of a shared political community as prejudicial and old fashioned They feel little sense of attachment to the American regime By contrast the lessons in Cords of Affection allow us to consider a broader array of possible tools for the maintenance of today s political attachments
