Metalinguistic

Performance and Interlinguistic Competence David Birdsong, 2012-12-06 It is often assumed that metalinguistic performance e.g. detection of ambiguity judgments of grammaticality straightforwardly reflects linguistic knowledge The inadequacies of such an assumption are explored in this volume which documents the subtleties of the relationship between metalinguistic performance and knowledge of a second language interlinguistic competence from the perspectives of language acquisition theory and cognitive and developmental psychology This thorough and up to date examination of metalinguistic phenomena offers insight to those involved in designing elicitation materials analyzing and interpreting metalinguistic performance data and applying such evidence to descriptions of interlanguage grammars and to second language acquisition theory The book also contributes constructively to the current debate concerning the role of metalinguistic variables in second language acquisition that is how they ultimately affect success or failure in learning a second language
