Magic Of The State:

The Magic of the State Michael Taussig, 2013-10-18 Set in the enchanted mountain of a spirit queen presiding over an unnamed postcolonial country this ethnographic work of ficto criticism recreates in written form the shrines by which the dead notably the fetishized forms of Europe's Others Indians and Blacks generate the magical powers of the modern state

Magic and Modernity Birgit Meyer, Peter Pels, 2003 This is the first book to explore comparatively how magic usually portrayed as the antithesis of the modern is also at home in modernity

Exploring Quantum Contextuality with Photons Zheng-Hao Liu, 2023-11-20 This thesis highlights research explorations in quantum contextuality with photons Quantum

contextuality is one of the most intriguing and peculiar predictions of quantum mechanics. It is also a cornerstone in modern quantum information science. It is the origin of the famous quantum nonlocality and various nonclassical paradoxes. It is also a resource for many quantum information processing tasks and even universal quantum computing. Therefore the study of quantum contextuality not only advances the comprehension of the foundations of quantum physics but also facilitates the practical applications of quantum information technology. In the last fifteen years the study of quantum contextuality has developed from a purely theoretical level to a stage where direct experimental tests become amenable. However the experimental research on contextuality at the current stage largely focuses on direct validations of some most famous predictions of contextuality while other forms of contextuality and its practical applications in quantum information science are rarely involved. The research in this thesis is committed to bridge this gap from two directions: 1 to construct and test stronger forms of contextuality and relieve the requirements of contextuality experiments on experimental platforms and 2 to explore the connections between contextuality and the other concepts in quantum information science and directly demonstrate the application of contextuality in broader scenarios. Specifically the thesis has discussed the research topics about the relationship between quantum contextuality and nonlocality, the all versus nothing paradoxes from quantum contextuality, the pre and post selection paradoxes from quantum contextuality and the topological protection and braiding dynamics of quantum contextuality in quasiparticle systems.

Digital Quantum Information Processing with Continuous-Variable Systems Takaya Matsuura, 2023-02-06. The book provides theoretical methods of connecting discrete variable quantum information processing to continuous variable one. It covers the two major fields of quantum information processing: quantum communication and quantum computation, leading to achievement of a long sought full security of continuous variable quantum key distribution (QKD) and proposal of a resource efficient method for optical quantum computing. Firstly the book provides a security of continuous variable QKD against arbitrary attacks under a realistic condition such as finite communication rounds and the use of digitized information processing. The book also provides the unified view for conventionally used approximate Gottesman-Kitaev-Preskill (GKP) codes which encode qudits on a continuous variable system, enabling direct comparison between researches based on different approximations. The book finally proposes a resource efficient method to realize the universal optical quantum computation using the GKP code via the direct preparation of the GKP magic state instead of GKP Pauli states. Feasibility of the proposed protocol is discussed based on the existing experimental proposals for the GKP state preparation.

Magic: The Life of Earvin "Magic" Johnson Roland Lazenby, 2023-10-24. The definitive biography of the basketball legend Earvin Magic Johnson from the highly respected career sportswriter and author of *Michael Jordan: The Life*. Magic Johnson is one of the most beloved and at times controversial athletes in history. His iconic smile lifted the dowdy sport of American professional basketball from a second tier sport with low ratings into the global spotlight, a transformation driven by Magic's ability to eviscerate opponents with a playing style

that featured his grand sense of fun He was a master entertainer who directed the Los Angeles Showtime Lakers to the heights of both glory and epic excess all of it driven by his mind blowing no look passes and personal charm Then in 1991 at the height of his charismatic power Johnson shocked the world with a startling cautionary tale about sexually transmitted disease that pushed public awareness of the HIV AIDS crisis Then out came his confession of unprotected sex with hundreds of women each year followed by his retirement an attempted return and a proper farewell on the iconic 1992 Olympic Dream Team Longtime biographer Roland Lazenby spent years tracking the unlikely ascension of Johnson an immensely popular public figure who was instantly scandalized but who then turned to his legendary will to rise again as a successful entrepreneur with another level of hard won success In Lazenby s portrayal Johnson s tale becomes bigger than that of one man It is a generational saga spanning parts of three centuries that reveals a great deal not just about his unique basketball journey but about America itself Through hundreds of interviews with Johnson s coaches representatives past and present teammates opponents friends and loved ones as well as key conversations with Johnson himself over the years Lazenby has produced the first truly definitive study both dark and light of Earvin Magic Johnson Jr the revolutionary player the icon the man
