Main Street Windsor To Quebec City:

The Myth of the North American City Michael Goldberg, John Mercer, 2011-11-01 The continuing tendency to continentalize Canadian issues has been particularly marked in the area of urban studies where United States based research findings methodologies and attitudes have held sway In this book Goldberg and Mercer demonstrate that the label North American City as widely used is inappropriate and misleading in discussion of the distinctive Canadian urban environment Examining such elements of the cultural context as mass values social and demographic structures the economy and political institutions they reveal salient differences between Canada and the United States One of the most important of the many contextual differences is the strong collective sense in Canada which accepts more public intervention in social and economic matters in contrast to the American commitment to individualism Canadians consequently expect a livable central city which is compact and well served by public transit and which has a fiscally sound local government To demonstrate these issues the discussion includes a detailed cross national empirical analysis of over 300 North American metropolitan areas along some three dozen dimensions including density transportation household change and structure income and fiscal disparities and economic structure Since much urban planning in Canada is based upon the continentalist assumption this volume should generate a reassessment of policy and encourage the development of a research base to suit the distinctiveness of the Canadian experience With growing pressures to take a North American view of Canadian policies it is vitally important that the differences delineated in this book are understood not just for their urban policy implications but for broader purposes as well *Beyond Walls: Re-inventing the Canada-United States Borderlands* Victor Konrad, Heather Nicol, 2016-12-05

September 11 2001 marked the beginning of a new era of security imperatives for many countries The border between Canada and the United States suddenly emerged from relative obscurity to become a focus of constant attention by media federal and state provincial governments on both sides of the boundary and the public at large This book provides a comprehensive examination of the Canada USA border in its 21st century form placing it within the context of border and borderlands theory globalization and the changing geopolitical dialogue It argues that this border has been reinvented as a state of the art technology steeped crossing system while the image of the border has been engineered to appear consistent with the friendly border of the past It shows how a border can evolve to a heightened level of security and yet continue to function well sustaining the massive flow of trade It argues whether in doing so the US Canada border offers a model for future borderlands Although this model is still evolving and still aspires toward better management practices the template may prove useful not only for North America but also in conflict border zones as well as the meshed border regions of the EU Africa s artificial line boundaries and other global situations *The New Practical Guide to Canadian Political Economy* Daniel Drache, Wallace Clement, 1985-01-01 The New Practical Guide to Canadian Political Economy is a handy reference to the vast range of research and writing that political economists in Canada have completed to the date of publication The

book is divided into twenty five subject bibliographies each one compiled and introduced by an expert in the field The overall range of subjects includes economic development in Canada Canada s external economic relations regional disparities and regional development social and economic classes women Native peoples politics and the Canadian state nationalism culture and political thought The book is indexed by author and includes a helpful shortlist of the staples in Canadian political economy Published in 1985 The New Practical Guide to Canadian Political Economy remains a useful reference to some of the classic literature of the discipline

A Social Geography of Canada Guy M. Robinson,2013-12-30 This collection of essays focus on subjects which formed the basis of his life s work the changing character of Canadian landscape and society and the urbanization of that society including aspects of its historical evolution its present spacial forms and current social issues

From Meteorite Impact to Constellation City Oiva W. Saarinen,2013-06-15 From Meteorite Impact to Constellation City is a historical geography of the City of Greater Sudbury The story that began billions of years ago encompasses dramatic physical and human events Among them are volcanic eruptions two meteorite impacts the ebb and flow of continental glaciers Aboriginal occupancy exploration and mapping by Europeans exploitation by fur traders and Canadian lumbermen and American entrepreneurs the rise of global mining giants unionism pollution and re greening and the creation of a unique constellation city of 160 000 The title posits the book s two main themes one physical in nature and the other human the great meteorite impact of some 1 85 billion years ago and the development of Sudbury from its inception in 1883 Unlike other large centres in Canada that exhibit a metropolitan form of development with a core and surrounding suburbs Sudbury developed in a pattern resembling a cluster of stars of differing sizes Many of Sudbury s most characteristic attributes are undergoing transformation Its rocky terrain and the negative impact from mining companies are giving way to attractive neighbourhoods and the planting of millions of trees Greater Sudbury s blue collar image as a union powerhouse in a one industry town is also changing recent advances in the fields of health education retailing and the local and international mining supply and services sector have greatly diversified its employment base This book shows how Sudbury evolved from a village to become the regional centre for northeastern Ontario and a global model for economic diversification and environmental rehabilitation
