Negative Campaigning An Analysis Of U S Senate Elections:

Negative Campaigning Richard R. Lau, Gerald M. Pomper, 2004 Negative campaigning is frequently denounced but it is not well understood Who conducts negative campaigns Do they work What is their effect on voter turnout and attitudes toward government Just in time for an assessment of election 2004 two distinguished political scientists bring us a sophisticated analysis of negative campaigns for the Senate from 1992 to 2002 The results of their study are surprising and challenge conventional wisdom negative campaigning has dominated relatively few elections over the past dozen years there is little evidence that it has had a deleterious effect on our political system and it is not a particularly effective campaign strategy These analyses bring novel empirical techniques to the study of basic normative questions of democratic theory and practice

New Perspectives on Negative Campaigning Alessandro Nai, Annemarie Walter, 2016-10-14 Have you ever seen a politician fiercely attacking his opponent Sure you have Election campaigns without attacks on the rival candidate's performance, policy propositions and traits simply do not exist Negative campaigning makes up a substantial part of election campaigns around the world Though heavily covered in election news the practice is strongly disliked by political pundits, journalists and voters Some are even concerned that negative campaigning damages democracy itself Negative campaigning has inspired numerous scholars in recent decades But much of the existing research examines the phenomenon only in the United States and scholars disagree on how the practice should be defined and measured which has resulted in open ended conclusions about its causes and effects This unique volume presents for the first time work examining negative campaigning in the US, Europe and beyond It presents systematic literature overviews and new work that touches upon three fundamental questions What is negative campaigning and can we measure it What causes negative campaigning And what are its effects

In Defense of Negativity John G. Geer, 2024-05-31 Americans tend to see negative campaign ads as just that negative Pundits journalists voters and scholars frequently complain that such ads undermine elections and even democratic government itself But John G Geer here takes the opposite stance arguing that when political candidates attack each other raising doubts about each other's views and qualifications voters and the democratic process benefit In Defense of Negativity Geer's study of negative advertising in presidential campaigns from 1960 to 2004 asserts that the proliferating attack ads are far more likely than positive ads to focus on salient political issues rather than politicians personal characteristics Accordingly the ads enrich the democratic process providing voters with relevant and substantial information before they head to the polls An important and timely contribution to American political discourse In Defense of Negativity concludes that if we want campaigns to grapple with relevant issues and address real problems negative ads just might be the solution
