Neighborhood Friends:

Neighborhoods, People, and Community Roger Ahlbrandt, 2013-03-09 This book focuses on neighborhoods and the people living in them. It describes differences among neighborhoods in terms of their social and institutional structure, attitudes of the residents, quality of life, and the characteristics of the residents. The book is based on the results of a survey of almost 6,000 residents living throughout the city of Pittsburgh. As such, it provides the basis for examining groups of people as well as whole neighborhoods. The communal aspects of urban living are discussed in Chapters 1 and 2, attachment toward the neighborhood in Chapter 3, importance of religion, life cycle, and race in Chapter 4, various aspects of individual social support systems and neighborhood social fabric in Chapters 5, 6, and 7, the contextual aspects of the neighborhood environment in Chapters 8 and 9, and the implications for urban policy in Chapter 10. The results of the analysis described in the book provide a detailed understanding of differences in the structure and composition of urban neighborhoods and they show why some groups of people are drawn into their neighborhoods whereas others rely more upon the wider community to meet a variety of needs. The analysis provides the framework in which to address the implications for urban policy, particularly with respect to mental health prevention and neighborhood and community renewal.

Living the Drama David J. Harding, 2010-04-15 For the middle class and the affluent, local ties seem to matter less and less these days, but in the inner city, your life can be irrevocably shaped by what block you live on. Living the Drama takes a close look at three neighborhoods in Boston to analyze the many complex ways that the context of community shapes the daily lives and long-term prospects of inner-city boys. David J. Harding studied sixty adolescent boys growing up in two very poor areas and one working-class area. In the first two, violence and neighborhood identification are inextricably linked as rivalries divide the city into spaces, safe, neutral, or dangerous. Consequently, Harding discovers, social relationships are determined by residential space. Older boys who can

navigate the dangers of the streets serve as role models and friendships between peers grow out of mutual protection The impact of community goes beyond the realm of same sex bonding Harding reveals affecting the boys experiences in school and with the opposite sex A unique glimpse into the world of urban adolescent boys Living the Drama paints a detailed insightful portrait of life in the inner city

Popular Democracy in Japan Sherry L. Martin, 2011-03-15 Popular Democracy in Japan examines a puzzle in Japanese politics Why do Japanese women turn out to vote at rates higher than men On the basis of in depth fieldwork in various parts of the country Sherry L. Martin argues that the exclusion of women from a full range of opportunities in public life provokes many of them to seek alternative outlets for self expression They have options that include a wide variety of study hobby and lifelong learning groups a feature of Japanese civic life that the Ministry of Education encourages Women who participate in these alternative spaces for learning tend Martin finds to examine the political conditions that have pushed them there Her research suggests that study group participation increases women s confidence in using various types of political participation including voting to pressure political elites for a more inclusive form of democracy Considerable overlap between the narratives that emerge from women s groups and a survey of national public opinion identifies these groups as crucial sites for crafting and circulating public discourses about politics Martin shows how the interplay between public opinion and institutional change has given rise to bottom up changes in electoral politics that culminated in the 2009 Democratic Party of Japan victory in the House of Representatives election

Mos,2009-06-12 Since the 17th century autobiography has an honorable place in the study of history In 1930 the preeminent historian of psychology Edwin Boring writes that a science separated from its history lacks direction and promises a future of uncertain importance To understand what psychology is and what it is becoming the autobiographies of famous psychologists is history at it best Here we find model inquirers of the science who offer a personalized account of themselves and their vocation in the context of the history of the science What is characteristic of many of those who have contributed to an alternate vision of psychological science is that they never considered themselves or were considered by others as belonging to the mainstream of the discipline In considering an alternative history of

psychology in autobiography the editor invited contributors whose research and writings have pushed the discipline in other directions pushed its limits and whose scholarship finds its philosophical framework outside the discipline altogether If these contributors may not be model inquirers their scholarship is very much a matter of consequence for those who wish to understand psychology Among the outliers included here are those who devoted themselves to the writing of psychology examining its history theories research and professional practices and who enthusiastically embraced over the course of their lives the discipline as a human science Their influence has been subtle as has been their appeal to many students who affection for the discipline finds its promise in a discerning self awareness and a critical understanding of others and their worlds This volume is not simply a collection of personal chronologies which might inspire or lend appreciation to a younger generation Our contributors write from their personal and professional experience of course but they write of their thinking and understanding of the psyche as an aspect of human life of psychology as an academic form of human sciences inquiry and so bring to bear their scientific and philosophical imagination to their personal challenges in their chosen vocation as psychologists Our contributors cover a broad swath of the second half of the 20th century the century of psychology Nurturing the discipline from within various philosophical social political and cultural roots their autobiographies exemplify marginality if not alienation from the mainstream even as their professional and personal lives give expression to engaged scholarship commitment to vocation and straightforwardly and reflectively a love of the heart From Germany Carl Graumann from France Erika Apfelbaum from Canada David Bakan and Kurt Danziger and from the United States Amedeo Giorgi Robert Rieber and Joseph Rychlak relate their lives to the larger contexts of our times Their personal stories are an integral part of the historiography of our discipline Indeed a contribution to historiography of our discipline is constituted in their autobiographical self presentations for their writings attest as much to their lives as model inquirers as they do to the possibility of psychology as a human science

Du Bois and His Rivals Raymond Wolters, 2002 W E B Du Bois was the preeminent black scholar of his era He was also a principal founder and for twenty eight years an executive officer of the nation's most effective civil rights organization the National Association for the Advancement of Colored People NAACP Even though Du Bois was best known for his lifelong stance against racial oppression he represented much more He condemned the racism of the white world but also criticized African Americans for mistakes of their own He opposed segregation but had reservations about integration Today he would be known as a pluralist In *Du Bois and His Rivals* Raymond Wolters provides a distinctive biography of this great pioneer of the American civil rights movement Readers are able to follow the outline of Du Bois's life but the book's main emphasis is on discrete scenes in his life especially the controversies that pitted Du Bois against his principal black rivals He challenged Booker T Washington because he could not abide Washington's conciliatory approach toward powerful whites At the same time Du Bois's pluralism led him to oppose the leading separatists and integrationists of his day He berated Marcus Garvey for giving up on America and urging blacks to pursue a separate destiny He also rejected Walter White's insistence that integration was the best way to promote the advancement of black people Du Bois felt that American blacks should be full fledged Americans with all the rights of other American citizens However he believed that they should also preserve and develop enough racial distinctiveness to enable them to maintain and foster a sense of racial identity community and pride *Du Bois and His Rivals* shows that Du Bois stood for much more than protest against racial oppression He was also committed to pluralism and his pluralism emphasized the importance of traditional standards and of internal cooperation within the black community Anyone interested in the civil rights movement black history or the history of the United States during the early twentieth century will find this book valuable
