Nepad At Country Level Changing Aid Relationships In Tanzania:

NEPAD at Country Level--changing Aid Relationships in Tanzania S. M. Wangwe, 2002 Tanzania has been a recipient of donor aid since the sixties and its relationships with donors have evolved considerably since then. One critical moment was in the early 1980s when donors began to question Tanzania's basic policy framework and management, firstly cutting back aid and then tying it more directly to policy reforms which precipitated worsening relations. At the height of this deterioration the Danish government funded an independent group of local and foreign experts to address the problems, primarily the point that Tanzania and Tanzanians no longer owned their policies and projects. In 2000 the Economic and Social Research Foundation was appointed as an independent broker to co-ordinate further. Professor Wangwe, the editor of this volume, was part of the working group. His book contains The Helleiner Report 1995 and recommendations which initiated the new phase of monitoring and records of the subsequent independent assessments made between 1997 and 2000. He presents an individual country's experience of reforming and monitoring aid relationships with a view to contributing to wider debates about new partnerships in development co-operation within individual countries and the African continent more widely, in particular within the framework of NEPAD.

Ownership, Leadership and Transformation Thomas Theisohn, Carlos Lopes, 2013-07-04 The third and final in a series, this text bridges the conceptual foundations of capacity development and the difficulties and practical realities in the field. It demystifies the process of capacity development to make it more user-friendly. The book has two parts. The first shows how long-standing development dilemmas can be turned into opportunities for capacity development and societal transformation. It proposes a set of principles to guide the search for context-specific approaches as the norm and based on these default principles the authors explore relevant issues in comprehensible stages through a capacity lens. The second part is a compilation of experiences and lessons from around the world to showcase promising initiatives and innovative solutions. It forms a casebook of insights and good rather than best practices on how development stakeholders can turn development dilemmas into opportunities tailored to the needs of their societies.

The Political Economy of Aid and Accountability Helen Tilley, 2016-02-24 The provision of aid is increasingly under scrutiny with increasing demands for results. This raises the question: what are our expectations from aid and are they realistic? Too often accountability is argued for without questioning if what is understood by the term is relevant or applicable. *The Political Economy of Aid and Accountability: The Rise and Fall of Budget Support in Tanzania* explores the real meaning of accountability and argues for a new approach to aid more relevant to recipient countries. Offering fresh, insightful ideas, Helen Tilley presents a contemporary theory of accountability through a case study of the delivery of general budget support in Tanzania. By considering the wider system of often contradictory political and social relations that influence and in turn constrain donor-government relations, she questions the traditional understanding of accountability and deconstructs its epistemological assumptions. Engaging in an interdisciplinary discussion drawing upon economics, sociology, political science

anthropology psychology and philosophy the book constructs a modern and nuanced understanding of accountability and foreign aid *The Delusion of Knowledge Transfer* Susanne Koch, Peter Weingart, 2016-12-13 With the rise of the knowledge for development paradigm expert advice has become a prime instrument of foreign aid At the same time it has been object of repeated criticism the chronic failure of technical assistance a notion under which advice is commonly subsumed has been documented in a host of studies Nonetheless international organisations continue to send advisors promising to increase the effectiveness of expert support if their technocratic recommendations are taken up This book reveals fundamental problems of expert advice in the context of aid that concern issues of power and legitimacy rather than merely flaws of implementation Based on empirical evidence from South Africa and Tanzania the authors show that aid related advisory processes are inevitably obstructed by colliding interests political pressures and hierarchical relations that impede knowledge transfer and mutual learning As a result recipient governments find themselves caught in a perpetual cycle of dependency continuously advised by experts who convey the shifting paradigms and agendas of their respective donor governments For young democracies the persistent presence of external actors is hazardous ultimately it poses a threat to the legitimacy of their governments if their policy making becomes more responsive to foreign demands than to the preferences and needs of their citizens

Challenges for the Democratisation Process in Tanzania Jonas Ewald, 2013 Tanzania has been independent in 2011 for 50 years While most neighbouring states have gone through violent conflicts Tanzania has managed to implement extensive reforms without armed political conflicts Hence Tanzania is an interesting case for Peace and Development research This dissertation analyses the political development in Tanzania since the introduction of the multiparty system in 1992 with a focus on the challenges for the democratisation process in connection with the 2000 and 2005 elections The question of to what extent Tanzania had moved towards a consolidation of democracy is analysed by looking at nine different institutions of importance for democratisation grouped in four spheres the state the political civil and economic society Focus is on the development of the political society and the role of the opposition in particular The analysis is based on secondary and primary material collected between September 2000 to April 2010 The main conclusion is that even if the institutions of liberal democracy have gradually developed in practice single party rule has continued manifested in the 2005 election when the CCM won 92% of seats Despite impressive economic growth poverty remains deep and has not been substantially reduced On a theoretical level this brings the old debate between liberal and substantive democracy back to the fore Neither the economic nor the political reforms have brought about a transformation of the political and economic system resulting in the poor majority gaining substantially more political influence and improved economic conditions Hence it is argued that the interface between the economic political and administrative reforms has not been sufficiently considered in the liberal democratic tradition Liberal democracy is necessary for a democratic development but not sufficient for democracy to be consolidated For that a substantive democratic development is necessary *The Delusion of Knowledge Transfer* Susanne

Koch, Peter Weingart, 2016-12-13 With the rise of the knowledge for development paradigm expert advice has become a prime instrument of foreign aid At the same time it has been object of repeated criticism the chronic failure of technical assistance a notion under which advice is commonly subsumed has been documented in a host of studies Nonetheless international organisations continue to send advisors promising to increase the effectiveness of expert support if their technocratic recommendations are taken up This book reveals fundamental problems of expert advice in the context of aid that concern issues of power and legitimacy rather than merely flaws of implementation Based on empirical evidence from South Africa and Tanzania the authors show that aid related advisory processes are inevitably obstructed by colliding interests political pressures and hierarchical relations that impede knowledge transfer and mutual learning As a result recipient governments find themselves caught in a perpetual cycle of dependency continuously advised by experts who convey the shifting paradigms and agendas of their respective donor governments For young democracies the persistent presence of external actors is hazardous ultimately it poses a threat to the legitimacy of their governments if their policy making becomes more responsive to foreign demands than to the preferences and needs of their citizens The Political Economy of Tanzania

Michael F. Lofchie, 2014-01-16 Since gaining independence the United Republic of Tanzania has enjoyed relative stability More recently the nation transitioned peacefully from single party democracy and socialism to a multiparty political system with a market based economy But Tanzania's development strategies based on the leading economic ideas at the time of independence also opened the door for unscrupulous dealmaking among political elites and led to economic decline in the 1960s and 1970s that continues to be felt today Indeed the shift to a market oriented economy was motivated in part by the fiscal interests of government profiteers The Political Economy of Tanzania focuses on the nation's economic development from 1961 to the present considering the global and domestic factors that have shaped Tanzania's economic policies over time Michael F Lofchie presents a compelling analysis of the successes and failures of a country whose postcolonial history has been deeply influenced by high ranking members of the political elite who have used their power to advance their own economic interests The Political Economy of Tanzania offers crucial lessons for scholars and policy makers with a stake in Africa's future *Toxic Aid* Sebastian Edwards, 2014-04-24 For many years Tanzania was the darling of international aid agencies During the 1970s it received more assistance per capita than any other nation in the world And yet the economy performed dismally growth was negative exports collapsed and poverty increased massively In the mid 1980s however the international community changed tacks and developed an approach based on conditionality and program ownership Since 1996 the country has grown steadily and social conditions have improved significantly This book provides an economic history of Tanzania since independence in 1961 It covers the policies of African Socialism and the Arusha Declaration the collapse of the early 1980s the rocky relationships with the IMF and the reforms of the 1990s and 2000s **Turbulence and Order in Economic Development** Hazel Gray, 2018-02-08 The terms of debate on the role of institutions in economic

development are changing Stable market institutions in particular secure private property rights and democratically accountable governments that uphold the rule of law are widely seen to be a pre requisite for economic transformation in low income countries yet over the last thirty years economic growth and structural transformation has surged forward in a range of countries where market and state institutions have differed these ideals as well as from each other

Turbulence and Order in Economic Development studies the role of the state in two such countries examining the interplay between market liberalization institutions and the distribution of power in Tanzania and Vietnam Tanzania and Vietnam were two of the poorest countries in the world in the early 1980s but over the last thirty years both have experienced significant changes in the pace and character of economic development While both countries experienced faster rates of GDP growth their paths of economic transformation were very different as Vietnam experienced rapid poverty reduction associated with the expansion of manufacturing while Tanzania's path of industrialization was characterized by the rise of mining and a much slower pace of poverty reduction

Employing a political settlements approach this book considers the comparative role of the state in driving economic transformation In both countries the experiences of socialism continued to shape the role of the state in the economy even after extensive market liberalization however the distribution of political and economic power was very different This had important consequences for the overlapping role of the state in generating political order and in driving economic transformation

Turbulence and Order in Economic Development studies the formal and informal ways that the state influenced economic transformation through its role in public financial management land and industrial policy

The Impact of Tanzania's New Land Laws on the Customary Land Rights of Pastoralists Kennedy Gastorn, 2008 This book investigates the effects of the 1999 Tanzanian land legislation on customary land tenure particularly that of pastoralists It is an original empirical and theoretical critical study of the laws and their implementation in securing land tenure of customary landholders in the face of the changing social political structures and as such constitutes a contribution to the current debate about the future of customary landholders in the reformed Tanzanian economy Among issues that receive particular attention in this study are the development of pastoral land tenure the main features of the new land laws introduced land schemes for pastoralists land dispute mechanisms the certification of village lands investments on village land the inclusion of unused or unoccupied village lands into the category of general land women's land rights and villager participation in the administration and management of village lands

African Successes, Volume I Sebastian Edwards, Simon Johnson, David N. Weil, 2016-09-23 Studies of African economic development frequently focus on the daunting challenges the continent faces From recurrent crises to ethnic conflicts and long standing corruption a raft of deep rooted problems has led many to regard the continent as facing many hurdles to raise living standards Yet Africa has made considerable progress in the past decade with a GDP growth rate exceeding five percent in some regions The African Successes series looks at recent improvements in living standards and other measures of development in many African countries with an eye toward identifying what shaped

them and the extent to which lessons learned are transferable and can guide policy in other nations and at the international level The first volume in the series African Successes Governments and Institutions considers the role governments and institutions have played in recent developments and identifies the factors that enable economists to predict the way institutions will function Toward a Better World Gerry Helleiner, 2018-01-01 In his memoir Towards a Better World Helleiner recounts his profound trip to Africa a trip that propelled him into a career devoted to the research advice and teaching of economic development and the reduction of global poverty Reality Check on Development Aid, 2003
