Nurturing Advanced Technology Enterprises Emerging Issues In State And Local Economic Development Policy:

Entrepreneurship, Innovation, and Economic Development Adam Szirmai, Wim Naudé, Micheline Goedhuys, 2011-04-28

Entrepreneurship and innovation are two of the most pervasive concepts of our times yet there are still gaps in our understanding of the interactions between entrepreneurship and innovation particularly in developing countries This book is an attempt to fill this gap It focuses on the entrepreneurship innovation development nexus drawing heavily on empirical evidence from developing countries Cross country and individual country experiences cover nations as diverse as Ethiopia India Turkey Vietnam and also examine lessons from advanced economies such as Finland Three sets of questions are addressed What is the impact of entrepreneurship and innovation on growth and development What determines the innovative performance of entrepreneurs in developing countries What role does the institutional environment play in shaping the extent and impact of innovative activities A key message is that entrepreneurial innovation whether through small firms large national firms or multinational firms is often vibrant in developing countries but does not always realise its full potential This is due to institutional constraints the absence of the appropriate mix of different types of small and large and domestic and foreign firms and insufficiently developed firm capabilities The contributions provide a better understanding of the determinants and impacts of innovation in developing countries and the policies and institutions that support or hinder innovation
