presentations which increased the exchange of ideas and stimulated informal discussion

Reversibility of Chronic Disease and Hypersensitivity, Volume 5 William J. Rea, Kalpana D. Patel, 2017-12-14 The clinical approaches to the chronic degenerative diseases that drain our resources and compromise our well being have become almost exclusively symptom focused The common wisdom is that they are idiopathic with final outcomes to be managed rather than prevented or cured That they are potentially reversible rarely enters any discussion between doctor and patient Reversibility of Chronic Disease and Hypersensitivity Volume 5 Treatment Options of Chemical Sensitivity the final volume of this set offers a much different perspective on chronic degenerative disease one that disputes the idiopathic label attached to most as well as the usual fatalistic prognosis

Preventive Nutrition Adrienne Bendich, Richard J. Deckelbaum, 2001-03-06 Nutrition has been recognized as a major determinant of health for centuries Traditionally nutritional sciences have primarily targeted the prevention of diseases resulting from clinical deficiencies of essential nutrients such as scurvy and rickets Contemporary nutritional research has focused on the prevention of major diseases of Western civilization particularly cardiovascular disease and cancer as well as promoting maternal and child health and healthy aging Heart disease and cancer which were rare in most developing countries several decades ago are increasing dramatically in these countries in parallel with economic development and dietary transitions decreases in infectious diseases and increasing sedentary lifestyle and obesity Substantial evidence indicates major chronic diseases such as coronary heart disease type 2 diabetes and some cancers are largely preventable by relatively simple diet and lifestyle modifications Despite the great potential of nutrition in preventing diseases and improving health nutrition is not routinely emphasized in the education and training of physicians and other health care professionals This has resulted in inadequate nutritional knowledge and lack of skills in providing dietary counseling among many health care professionals Further more in the past decade the public's access to nutritional information has been increasing rapidly particularly through the Internet There are now hundreds of websites providing a wide range of nutritional information and selling numerous dietary products Because of the explosion in nutritional information the public's demand for nutritional advice has been increasing rapidly and will continue to rise
