Taming the Past Robert W. Gordon, 2017-06-09 Lawyers and judges often make arguments based on history on the authority of precedent and original constitutional understandings. They argue both to preserve the inspirational heroic past and to discard its darker pieces such as feudalism and slavery, the tyranny of princes and priests and the subordination of women. In doing so, lawyers tame the unruly, ugly, embarrassing elements of the past, smoothing them into reassuring tales of progress. In a series of essays and lectures written over forty years, Robert W. Gordon describes and analyses how lawyers approach the past and the strategies they use to recruit history for present use while erasing or keeping at bay its threatening or inconvenient aspects. Together, the corpus of work featured in *Taming the Past* offers an analysis of American law and society and its leading historians since 1900.

The Presence of the Past in a Spanish Village Ruth Behar, 2014-07-14 This study of a northern Spanish community shows how the residents of Santa Mar a del Monte have acted together at critical times to ensure the survival of their traditional forms of social organization. The survival of these forms has allowed the villagers in turn to weather demographic, political, and economic crises over the centuries. Originally published in 1991, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. Meaning, Discourse and Society Wolfgang Teubert, 2010-03-25 *Meaning, Discourse and Society* investigates the construction of reality within discourse. When people talk about things such as language, the mind, globalisation, or weeds, they are less discussing the outside world than objects they have created collaboratively by talking about them. Wolfgang Teubert shows that meaning cannot be found in mental concepts or neural activity as implied by the cognitive sciences. He argues instead that meaning is negotiated and knowledge is created by symbolic interaction, thus taking language as a social rather than a mental phenomenon. Discourses, Teubert contends, can be viewed as collective minds enabling the members of discourse communities to make sense of themselves and of the world around them. By taking an active stance in constructing the reality they share, people thus can take part in moulding the world in accordance with their perceived needs.

From Mother of the Redemption to Mother of All Believers Antoni Nadbrzeżny, 2024-12-09 Antoni Nadbrzeżny exposes the personalistic character of Schillebeeckx's Mariology In his book the author presents Mary as a human being whose holiness is great and mysterious According to the Flemish theologian Mary becomes the guarantor of the full and true humanity of Jesus It is a Mariology that finds its foundation in the history of salvation The book does not follow the path of abstract metaphysics but pays more attention to the real and existential elements of Mary's life This reinterpretation finds its source in the application of phenomenological thought In his theological picture of Mary Schillebeeckx rejects all Gnostic idyllic and dualistic thoughts The Mother of God appears as someone who seeks God who shares the tragic fate of the world and recognizes her place and mission in salvation history She participates in human suffering and the trial of faith

On the Digital Semiosphere John Hartley, Indrek Ibrus, Maarja Ojamaa, 2022-07-28 It is only since global media and digital communications became accessible to ordinary populations with Telstar jumbo jets the pc and mobile devices that humans have been able to experience their own world as planetary in extent What does it mean to be one species on one planet rather than a patchwork of scattered combative and mutually untranslatable cultures One of the most original and prescient thinkers to tackle cultural globalisation was Juri Lotman 1922-93 *On the Digital Semiosphere* shows how his general model of the semiosphere provides a unique and compelling key to the dynamics and functions of today's globalised digital media systems and in turn their interactions and impact on planetary systems Developing their own reworked and updated model of Lotman's evolutionary and dynamic approach to the semiosphere or cultural universe the authors offer a unique account of the world scale mechanisms that shape media meanings creativity and change both productive and destructive In so doing they re-examine the relations among the contributing sciences and disciplines that have emerged to explain these phenomena seeking to close the gap between biosciences and humanities in an integrated cultural science approach
