Past Climate Variability Through Europe And Africa

J. Runge

Past Climate Variability Through Europe And Africa:

Past Climate Variability through Europe and Africa Richard W. Battarbee, Françoise Gasse, Catherine E. Stickley, 2007-11-06 This book provides a major synthesis of evidence for past climate variability at the regional and continental scale across Europe and Africa. It focuses on two complementary time scales: the Holocene (approximately the last 11 500 years) and the last glacial interglacial cycle (approximately the last 130 000 years). An overview of the climate system of the past has never been attempted before on this scale and as such the volume represents a benchmark for future research. It is written by an expert group of climate change scientists and presents an insight into past climate variability that challenges climatologists who seek to explain climate dynamics of the past and provides climate modellers with a work of reference for data model comparison. The book is an advanced but very readable text essential for all students and scientists interested in global environmental change.

Past Climate Variability Through Europe and Africa, 2001 Quaternary Environmental Change in the Tropics Sarah E. Metcalfe, David J. Nash, 2012-08-24 The global climate changes that led to the expansion and contraction of high latitude ice sheets during the Quaternary period were associated with equally dramatic changes in tropical environments. These included shifts in vegetation zones, changes in the hydrology and ecology of lakes and rivers and fluctuations in the size of mountain glaciers and sandy deserts. Until recently it was thought that such changes were triggered by fluctuations in the distribution of polar ice cover. Now there is increasing recognition that the tropics themselves have acted as drivers of global climate change over a range of timescales. The aim of *Quaternary Environmental Change in the Tropics* is to provide a synthesis of the changes that occurred in tropical terrestrial and marine systems during the Pleistocene and Holocene, complementing data derived reconstructions with output from state of the art climate models. It is targeted at final year undergraduate students and research specialists but will provide an introduction to tropical Quaternary research for a variety of other readers.

African Palaeoenvironments and Geomorphic Landscape Evolution Jörgen Runge, 2010-11-01 This 30th jubilee volume 2010 of *Palaeoecology of Africa* looks back and reflects the state of the art of what is actually known on former African climates and ecosystems in the format of review articles authored by specialists in the field. New research articles on climate and ecosystem dynamics as well as applied topics on geomorphic ha.

Dynamics of Forest Ecosystems in Central Africa During the Holocene: Past - Present - Future J. Runge, 2014-04-21 Bringing together experts from several disciplines this volume collects the best papers presented at the international workshop on Environmental and Cultural Change in West and Central Africa held in Cameroon March 2006. Problems of Holocene and Late Pleistocene modifications of the rain forest savanna fringe and their possible influence on cultural innovations are discussed. This is an important resource for those concerned with tropical forests and related development problems of third world countries. It is an excellent source of information for new original manuscripts on the topic of Late Pleistocene and Holocene landscape evolution in the lower latitudes of Africa.

Aquatic Biodiversity Koen

Martens,2012-12-06 In this age of increased fundamental and applied research on biodiversity no single volume was as yet devoted to the various temporal and spatial aspects of aquatic biodiversity The present book is published in honour of Professor Henri Dumont Ghent Belgium at the occasion of his retirement as Editor in Chief of Hydrobiologia The volume presents a selection of contributions on aquatic biodiversity written by colleagues from the editorial board fellow editors of aquatic journals and former students and collaborators Contributions deal with a wide spectrum of topics related to aquatic biodiversity and cover fields such as actual and palaeolimnology taxonomy and fundamental and applied limnology Even reconnaissance chapters on management and cultural impact of water bodies are included The book combines state of the art contributions in aquatic sciences *Plants and People in the African Past* Anna Maria Mercuri,A. Catherine D'Andrea,Rita Fornaciari,Alexa Höhn,2018-07-31 There is an essential connection between humans and plants cultures and environments and this is especially evident looking at the long history of the African continent This book comprising current research in archaeobotany on Africa elucidates human adaptation and innovation with respect to the exploitation of plant resources In the long term perspective climatic changes of the environment as well as human impact have posed constant challenges to the interaction between peoples and the plants growing in different countries and latitudes This book provides an insight into overview of the manifold routes people have taken in various parts Africa in order to make a decent living from the provisions of their environment by bringing together the analyses of macroscopic and microscopic plant remains with ethnographic botanical geographical and linguistic research The numerous chapters cover almost all the continent countries and were prepared by most of the scholars who study African archaeobotany i e the complex and composite history of plant uses and environmental transformations during the Holocene Bondage and the Environment in the Indian Ocean World Gwyn Campbell,2018-01-10 Monsoon rains winds and currents have shaped patterns of production and exchange in the Indian Ocean world IOW for centuries Consequently as this volume demonstrates the environment has also played a central role in determining the region s systems of bondage and human trafficking Contributors trace intricate links between environmental forces human suffering and political conditions examining how they have driven people into servile labour and shaped the IOW economy They illuminate the complexities of IOW bondage with case studies drawn chiefly from the mid eighteenth century on Sudan Cape Colony R union China and beyond where chattel slavery as seen in the Atlantic world represented only one extreme of a wide spectrum of systems of unfree labour The array of factors examined here including climate change environmental disaster disease and market forces are central to IOW history and to modern day forms of human bondage *Paleoclimates* Thomas M. Cronin,2010 When combined with computer model simulations paleoclimatic reconstructions are used to test hypotheses about the causes of climatic change such as greenhouse gases solar variability earth s orbital variations and hydrological oceanic and tectonic processes This book is a comprehensive state of the art synthesis of paleoclimate research covering all geological timescales emphasizing topics that shed light on modern trends in

the earth s climate Book Jacket

A Scientific Bibliography of the Drakensberg, Maloti and Adjacent Lowlands

Rodney Moffett, 2021-04-19 This bibliography includes scientific articles on the Drakensberg Maloti and Adjacent Lowlands published between 1808 and 2019 Although focussing on material appearing in accredited journals there is such a wealth of information in the form of unpublished yet traceable reports documents presentations and dissertations these are also included The bibliography has two parts a complete list arranged alphabetically and the same references arranged in 33 different disciplines These range from Palaeobotany with 17 entries to Rock Art with 502 entries

Whispering the Techniques of Language: An Emotional Journey through **Past Climate Variability Through Europe And Africa**

In a digitally-driven earth wherever monitors reign great and immediate conversation drowns out the subtleties of language, the profound secrets and mental subtleties concealed within words often move unheard. However, situated within the pages of **Past Climate Variability Through Europe And Africa** a interesting literary prize blinking with fresh feelings, lies an extraordinary quest waiting to be undertaken. Composed by a skilled wordsmith, that wonderful opus attracts visitors on an introspective trip, delicately unraveling the veiled truths and profound affect resonating within the very cloth of each and every word. Within the mental depths of this emotional evaluation, we can embark upon a sincere exploration of the book is core styles, dissect their interesting writing model, and yield to the powerful resonance it evokes strong within the recesses of readers hearts.
