Preparation of Nuclear Targets for Particle Accelerators Josef Jaklovsky, 2013-03-13 This book contains the Proceedings of the World Conference of the International Nuclear Target Development Society held in Boston October 1-3 1979. Approximately seventy participants and registrants from the following countries attended this Conference: Belgium, Canada, Denmark, United Kingdom, German Federal Republic, Israel, Japan, The Netherlands, Saudi Arabia, Switzerland, and the United States. The Conference was sponsored by the New England Nuclear Corporation. Conference Chairman in residence was Jozef Jaklovsky who was assisted by the invited Co Chairman D. Riel of the State University of New York at Stony Brook. This publication incorporates the proceedings of an international conference concentrating on the general field of target preparation for use with particle accelerators. The publication includes additional contributions on target preparations by honorary members of this Society. For the first time in this field an extensive bibliography collection 1936-June 1980 is included. Bibliography, subject index, author index, country index, and patent index have been organized by the editor. The bibliography includes thin and thick particle accelerator targets and also preparation and use of targets in particle accelerators.

Radionuclides Production Frank Helus,2019-06-04 First Published in 1983 this book offers a full comprehensive guide into the production of radioactive nuclides Carefully compiled and filled with a vast repertoire of notes diagrams and references this book serves as a useful reference for Students of Radiology and other practitioners in their respective fields

Radiopharmaceutical Chemistry Jason S. Lewis,Albert D. Windhorst,Brian M. Zeglis,2019-04-02 This book is a comprehensive guide to radiopharmaceutical chemistry The stunning clinical successes of nuclear imaging and targeted radiotherapy have resulted in rapid growth in the field of radiopharmaceutical chemistry an essential component of nuclear medicine and radiology However at this point interest in the field outpaces the academic and educational infrastructure needed to train radiopharmaceutical chemists For example the vast majority of texts that address radiopharmaceutical chemistry do so only peripherally focusing instead on nuclear chemistry i e nuclear reactions in reactors heavy element radiochemistry i e the decomposition of radioactive waste or solely on the clinical applications of radiopharmaceuticals e g the use of PET tracers in oncology This text fills that gap by focusing on the chemistry of radiopharmaceuticals with key coverage of how that knowledge translates to the development of diagnostic and therapeutic radiopharmaceuticals for the clinic The text is divided into three overarching sections First Principles Radiochemistry and Special Topics The first is a general overview covering fundamental and broad issues like The Production of Radionuclides and Basics of Radiochemistry The second section is the main focus of the book In this section each chapter s author will delve much deeper into the subject matter covering both well established and state of the art techniques in radiopharmaceutical chemistry This section will be divided according to radionuclide and will include chapters on radiolabeling methods using all of the common nuclides employed in radiopharmaceuticals including four chapters on the ubiquitously used fluorine 18 and a Best of the Rest chapter to cover emerging radionuclides Finally the third section of the book is dedicated to special topics with important information for radiochemists including Bioconjugation Methods Click Chemistry in Radiochemistry and Radiochemical Instrumentation This is an ideal educational guide for nuclear medicine physicians radiologists and radiopharmaceutical chemists as well as residents and trainees in all of these areas *Proceedings of the First International Symposium on Diamond and Diamond-Like Films* John P. Dismukes,1989
