The Regional Dynamics of Language Differentiation in Belgium Alexander B. Murphy, Jeffrey A. Gritzner, 1988

Regional Worlds: Advancing the Geography of Regions Martin Jones, Anssi Paasi, 2017-10-02 A key concern in the debate and empirical research on the geography of regions is the evolution of the conceptualizations and practical uses of the idea of region. This idea prioritises both the intellectual and the practical development of regional studies. This book drives the discussion further. It stresses the complex forms of agency advocacy involved in the production and reproduction of regional spaces and space of regionalism as well as the importance of geohistory and context. The book moves beyond the territorial relational divide that has characterized debates on regions and regional borders since the 1990s. The contributors answer key questions from different conceptual and concrete contextual angles and to motivate readers to reflect on the perpetual significance of regional concepts and how they are mobilized by various actors to maintain or transform the contested spatialities of societal power relations. This book was based on a special issue of *Regional Studies*.

Perspectives on Planning and Urban Development in Belgium Ashok K. Dutt, F.J. Costa, 2013-03-09 Belgium is a small country but its planning traditions are rooted in a heritage which has been greatly enriched by its central location in the West European community of nations. Medieval, Renaissance and industrial age planning and urban design gave Belgium many examples of architectural masterpieces, especially in the city centers. During the post World War II period, Belgian planners and politicians legislated national planning laws that divided the country into 48 planning regions, also called sub regions and sectors, and empowered the municipalities (communes) with potent legal instruments to direct land development in accordance with their plans. Preparation, amendment and execution of these plans in a democratic society with a strong *laissez-faire* tradition have been painstaking but nonetheless significant tangible results have been achieved. The purpose of this book is to explore and assess the successes and failure of Belgian planning and make this record available in English so that they may remain facets of Belgian planning. The general socio-economic and historical background is provided with a view to understanding the theoretical, legal, physical and selected topical aspects of Belgian planning. In doing so, a multi-disciplinary approach has been

taken and the authors have been selected from a variety of disciplines Professor Louis Albrechts of the University of Leuven is a planning theorist Ms Brigitte Beernaert and Mr Karel Vroom are practicing planners Beernaert is also a planning historian Legal and administrative backgrounds are represented by the planning experts Dr

Hensley, 2023-12-28 This book examines the efforts of the French speaking minority in Flanders Belgium to maintain a legal and social presence of the French language in Flemish public life Chronologically the study is bookended by two developments almost exactly a century apart In 1873 the first laws were passed which required the use of Dutch in some aspects of public administration in Flanders challenging the de facto use of French among the Flemish ruling class One hundred and one years later the last French daily newspaper in Flanders collapsed marking the end of a once vibrant French language public sphere in Flanders The author contends that the methods and arguments by which French speakers defended the role of French in Flemish public life changed along with the social and political situation of this minority As the Flemish movement grew over the course of the twentieth century French speakers appeals to the free choice of language lost traction and they put forward claims that they represented an ethnolinguistic minority who deserved protection for their mother tongue Providing new insights for scholars of European history and in conversation with the literature on liberalism national identity and Francophonie this book demonstrates how the debate over the role of French in Flanders was at the center of Belgium's ethnolinguistic conflict the repercussions of which continue to be felt to this day Urban Regimes and Strategies A. G. Papadopoulos, 1996-11-15 If a city based its planning decisions on the needs of an international bureaucracy rather than on the traditional needs of local residents and businesses how would that city change Alex G Papadopoulos addresses this question with a detailed study of how the nineteenth century quarters of Leopold and Nord Est in Brussels have been transformed materially and functionally since the European Communities decided to locate their administrative headquarters

there in 1957 Drawing on game and rational choice theories spatial analysis and urban morphology studies Papadopoulos analyzes how the landscape of Brussels s center has evolved over the last three decades under the influence of successive coalitions of local and foreign elites He describes how international real estate developers form ephemeral flexible and specialized regimes of cooperation with governmental organizations at all levels and with special interest lobbies to carry out major urban projects while local neighborhood groups conservationists and political factions such as the Green Party oppose them with qualitatively similar regimes of resistance *Restructuring the European State* Paolo Dardanelli,2017-12-12 Why European integration fuels state disintegration **Just Democracy** Philippe Van Parijs,2014-12-01 Philippe Van Parijs is one of the world s leading political philosophers In this book he argues that the purpose of democracy should be to promote justice we need not just democracy in the sense of unqualified democracy but a just democracy Machiavelli and Rawls must be brought together In a series of provocative and timely essays he explores what creating such a just democratic political system would involve in order to tackle such issues as intergenerational justice multiculturalism and linguistic diversity He illustrates his arguments with examples drawn from the European Union and his native Belgium Secessionism and the European Union Glen M.E. Duerr,2015-10-30 Secessionist also called nationalist or pro independence political parties exist in many countries in the developed world they raise and then spend a lot of money win votes in elections and their elected officials serve in seats in local regional and national parliaments Yet despite all of this effort there has not been a successful case of secession since 1921 when the Irish Free State effectively seceded from the United Kingdom UK Perhaps the biggest issue is that these secessionist political parties have rarely been popular enough to form a government even amongst their core ethnic group This is further compounded by the fact that secessionist parties have historically been unable to win support from immigrants or people outside their core ethnic and or linguistic group Given this context four central questions are posed in this study including whether and also why any of the secessionist parties have transitioned from ethnic based to civic based policy platforms Why have these secessionist parties not yet achieved independence And what role does the European Union EU play in facilitating or deterring secession in independence seeking regions within member states This study examines three different cases Flanders in Belgium Scotland in the UK and Catalonia in Spain to investigate how secessionist political parties are approaching the issue of independence All of the cases are different with respect to history governmental structure and economic situation Yet all of the cases are similar in some ways they are close to the same size in terms of population operate within mature democratic political systems have distinct secessionist political parties and all reside within member states of the EU Categorically in all cases there are also shared influences of the ability of the region to secede institutions interests and ideas *The Minorities of Cyprus* Nicholas Coureas,Marina Elia,Andrekos Varnava,2009-05-27 This book examines the various minorities living in the island of Cyprus from the early modern late Venetian and early Ottoman period down to the present day It charts their history with special emphasis on their relations

with the powers ruling Cyprus and with the two dominant Christian Greek and Muslim Turkish communities. The theme running through the book is that despite being significant members of Cyprus society the three historical minorities Maronites, Armenians and Latins were only included in society to a certain extent by the two major communities. This was formalised in the post independence 1960 period when they were compelled to become members of either dominant community and thus they suffered internal exclusion by being regarded as religious sub groups of one of the two dominant communities rather than national minorities in their own right. Within this general context the social, legal and political roles, customs, culture and language of the various minorities are examined as they evolved through time and in response to internal and external developments affecting Cyprus in the political, economic and global spheres. They are discussed not as static entities but as evolving groups that have adapted with greater or lesser degrees of success to the radical and at times painful changes Cyprus has undergone especially over the last 150 years in all walks of life. Finally the question of what the future holds for the minorities of the island in the light of Cyprus EU membership and the prospect of reunification are also analysed. This book is a product of the conference Minorities of Cyprus Past Present and Future which was held on 24 and 25 November 2007 at the European University Cyprus.

The Belgian Army and Society from Independence to the Great War Mario Draper, 2018-02-13. This book explores Belgian state building through the prism of its army from independence to the First World War. It argues that party politics which often ran along geographical, linguistic and religious lines prevented both Flemings and Walloons from reconciling their regional identities into a unified concept of Belgian nationalism. Equally it obstructed the army from satisfactorily preparing to uphold Belgium's imposed neutrality before 1914. Situated uneasily between the two powerhouses of nineteenth century Europe, Belgium offers a unique insight into the concepts of citizenship and militarisation in a divided society in the era of fervent nationalism. By examining the composition, experience and image of the army's officer corps and rank and file as well as those of the auxiliary forces, this book shows that although military and civilian society often stood aloof from one another, the army as a national institution offered a fleeting glimpse into the dichotomy that was pre-war Belgium.

Culture, Identity and Nationalism Timothy Baycroft, 2004. This study examines the evolution of national and regional cultural and political identities in that northern region of France which borders Belgium over the two centuries which followed the French Revolution. During that time the region was transformed by the development of the industrial economy, population shifts, war and occupation and numerous changes of political regime. Through an analysis of a wide range of issues including language, regional and national political movements, educational policy, attitudes towards immigrants and the border, the press, trade unions and the church as well as the attitude of the French State, the author questions traditional interpretations of the process of national assimilation in France. At the same time he illustrates how the Franco-Belgian border, originally an arbitrary line through a culturally homogeneous region, became not only a significant marker for the identity of the French Flemish but a real cultural division.
