Regional dynamics I Kingsley E. Haynes, Peter Nijkamp, Kenneth John Button, 1996 **Environment and Planning**, 1999

The Cambridge Economic History of Modern Britain: Volume 1, Industrialisation, 1700–1870 Roderick Floud, Jane Humphries, Paul Johnson, 2014-10-09 A new edition of the leading textbook on the economic history of Britain since industrialization Combining the expertise of more than thirty leading historians and economists Volume 1 tracks Britain's economic history in the period ranging from 1700 to 1870 from industrialisation to global trade and empire Each chapter provides a clear guide to the major controversies in the field and students are shown how to connect historical evidence with economic theory and apply quantitative methods New approaches are proposed to classic issues such as the causes and consequences of industrialisation the role of institutions and the state and the transition from an organic to an inorganic economy as well as introducing new issues such as globalisation convergence and divergence the role of science technology and invention and the growth of consumerism Throughout the volume British experience is set within an international context and its performance benchmarked against its global competitors **Forthcoming Books** Rose Arny, 2002

Location Theory Jacques-François Thisse, Kenneth John Button, Peter Nijkamp, 1996 In recent years a growing number of social scientists have become increasingly interested in the study of location problems This interest has been fostered by the integration of national economies within broader spaces such as the EU or NAFTA as well as by their impact on the development of regions and cities Another important reason for this attention is the growing awareness among economists that a comprehensive economic theory can no longer put space aside Most economic activities are distributed over space and for such activities space moulds the very nature of competition between firms This major collection of classic articles demonstrates the important contribution of location theory and will be an essential source of reference for students or researchers of modern regional science or economic theory
