Unjustifiable Risk? Simon Thompson, 2012-03-06 To the impartial observer Britain does not appear to have any mountains Yet the British invented the sport of mountain climbing and for two periods in history British climbers led the world in the pursuit of this beautiful and dangerous obsession *Unjustifiable Risk* is the story of the social economic and cultural conditions that gave rise to the sport and the achievements and motives of the scientists and poets parsons and anarchists villains and judges ascetics and drunks that have shaped its development over the past two hundred years The history of climbing inevitably reflects the wider changes that have occurred in British society including class gender nationalism and war but the sport has also contributed to changing social attitudes to nature and beauty heroism and death Over the years increasing wealth leisure and mobility have gradually transformed climbing from an activity undertaken by an eccentric and privileged minority into a sub division of the leisure and tourist industry while competition improved technology and information and increasing specialisation have helped to create climbs of unimaginable difficulty at the leading edge of the sport But while much has changed even more has remained the same Today's climbers would be instantly recognisable to their Victorian predecessors with their desire to escape from the crowded complexity of urban society and willingness to take unjustifiable risk in pursuit of beauty adventure and self fulfilment *Unjustifiable Risk* was shortlisted for the Boardman Tasker prize in 2011

Thérèse and Martin Karin Johannesson, 2023-04-24 The Carmelite nun Therese of the Child Jesus 1873 1897 lived a contemplative monastic life Through her writings she continues to help people who live in completely different contexts to discover that God is always present in the middle of everyday life Like Martin Luther 1483 1546 Therese clearly distances herself from the idea that we can earn our salvation from God This

book begins by highlighting the extensive similarities between Therese's teaching and Martin Luther's theology. With the help of the three Carmelite Doctors of the Church, Therese of the Child Jesus, Teresa of Avila (1515-1582) and John of the Cross (1542-1591), the discussion develops further and a receptive ecumenical study is carried out. The overall question is how the Carmelite tradition can enrich the Evangelical Lutheran tradition in a way that contributes to the renewal of the church. It is argued that such a renewal is of vital importance if people today are to receive the spiritual guidance that they are longing for.

Other Everests Paul Gilchrist, Peter Hansen, Jonathan Westaway, 2024-11-26 A hundred years after the tragic 1924 British Everest expedition, this collection explores the wider social and cultural history of the mountain. Mount Everest looms large in the popular imagination. Since the deaths of mountaineers George Mallory and Andrew Irvine in 1924, histories of the mountain have overwhelmingly focused on the mythologies of western male adventure and conquest. But there are many more stories waiting to be told. *Other Everests* brings together new voices and perspectives on the historical and cultural significance of Everest in the modern world. The book shines a light on the overlooked role of local people and high altitude workers while also revealing the significant contributions women have made to climbing the mountain and writing its history. It explores the depiction of Everest in a range of media and investigates how the forces of nationalism and commercialism have shaped many different Everests. After years of exploitation, Indigenous people are now reclaiming Mount Everest in the twenty-first century. *Other Everests* re-examines the past and present of the world's highest peak, presenting an exciting vision of what Everest might become in the future.

False Summit Julie Rak, 2021-04-14 The race to climb Everest catapulted mountain climbing with its accompanying images of conquest and sport into the public sphere on a global scale. But as a metaphor for the pinnacle of human achievement, mountaineering remains the preserve of traditional white male heroism. *False Summit* unpacks gender politics in the expedition narratives and memoirs of mountaineers in the Himalayas and the Karakoram. Why are women still a minority in the world's highest places? Julie Rak proposes that the genre has itself reached a false summit, a peak that proves not to be the pinnacle and that mountaineering is not ready to welcome other ways of climbing or other kinds of climbers. For more than two centuries, mountaineering as an activity and as an ideal has helped shape how the self is understood within the context of conquest, adventure, and proximity to risk. As climbing shows signs of becoming more diverse, Rak asks why change is so hard to achieve and why gender bias and other inequities exist in climbing at all. Exploring classic and lesser-known expedition accounts from Everest, K2, and Annapurna, *False Summit* helps us understand why mountaineering remains one of the most important ways to articulate gender identities and politics.
