Rutland, 2021-02-22 This book explores the advantages of and challenges concerning Special Religious Education SRE in multicultural Australia and argues for the need for General Religious Education GRE as well Through the lens of the most recent scholarship and drawing on an in depth qualitative study and specific case studies the book examines the current debate on the role of religious education within government schools It addresses key concepts of values education spirituality health and wellbeing and cultural and religious identity It analyses why it is important to retain SRE together with GRE as government policy It explores highly relevant controversial and contested issues regarding SRE including the 30% of Australia's population who declare themselves as having no religion and brings fresh insights to the table While secularization has increased in both the national and international spheres there has also been an increase in fundamentalism within religious beliefs Events such as the September 11 terror attacks and the more recent mass shootings by white supremacists and eco fascists in Christchurch New Zealand and Pittsburgh and San Diego in the USA are reminders that religion is still a major actor in the twenty first century This poses new challenges for the relationship between church and state and demonstrates the need to revisit the role of religious education within government schools While the importance of GRE is generally acknowledged SRE has increasingly come under attack by some researchers and teacher and parent bodies as being inappropriate and contradictory to the values of the postmodern world On the other hand the key

**Essays on Culture, Religion and Rights** Peter Jones, 2020-10-09 Culture and religion are overlapping phenomena cultures are normally understood to subsume religions and religions are very often central to cultures The two are particularly closely associated when we focus on the kinds of difference that generate issues for public policy The world has always been culturally and religiously diverse but recent movements of population have intensified the internal diversity of societies That increased diversity has presented societies with a number of pressing questions How much should cultural differences matter Can they and should they be treated impartially Should they receive equal recognition and what sort of recognition might that be Are cultural and religious differences at odds with human rights thinking or do universal human rights demand respect for those differences When the demands of a religious faith clash with those of a society's rules which should take precedence Should the religious have to endure whatever burdens their beliefs bring their way or should they be accommodated so that their religious faith does not become a source of social disadvantage Should they have to put up with unwelcome treatments of their beliefs or should they be protected from the offensive and the disrespectful These are some of the many issues examined in Culture Religion and Rights

**The Politics of Social Cohesion** Nils Holtug, 2021-12-16 Immigration is a divisive policy issue in modern liberal democracies A common worry is that immigration poses a threat to social cohesion and so to the social unity that underpins cooperation stable democratic institutions and a robust welfare state At the heart of this worry is the suggestion that social cohesion requires a shared identity at the societal level In The Politics of Social Cohesion Nils Holtug gives a careful assessment of the impact of immigration on social cohesion and egalitarian redistribution First he critically scrutinizes an influential argument according to which immigration leads to ethnic diversity which again tends to undermine trust and solidarity and so the social basis for redistribution According to this argument immigration should be severely restricted And second he considers the suggestion that in response to worries about immigration states should promote a shared identity to foster social cohesion in the citizenry Holtug argues that the effects of immigration on social cohesion do not need to compromise social justice and that core principles of liberty and equality not only form the normative basis for just policies of immigration and integration but as a matter of empirical fact are also the values that if shared are most likely to produce the social cohesion among community members that provides the social basis for implementing justice
