Western and Eastern Perspectives on Religion and Religiosity Sarah Demmrich, Ulrich Riegel, 2020-12-23 The concept of religiosity is a highly individual aspect of religion The understanding of it was shaped in Protestant circles in the Western context and it has inspired a huge body of research and further developments in theology as well as in religious education However both charismatic movements within Christianity and orthopractic religious traditions such as Islam raise the question of whether an individualized account of religiosity is able to grasp the spectrum of lived religion comprehensively Furthermore with increasing globalization even Asian worldviews like Hinduism or Buddhism are part of daily experience and have expanded the notion of what can be perceived of as religion These changes were discussed at the international conference Religiosity in East and West Conceptual and Methodological Challenges at the University of Münster Germany from 25 to 27 June 2019 With this volume of conference proceedings we pay special attention to the most significant conference contributions relevant to religious education and practical theology

Handbook of Adult Development Jack Demick, Carrie Andreoletti, 2012-12-06 This volume is an outgrowth of contemporary research on development over the adult lifespan which by now has burgeoned and developed both nationally and internationally However for us the impetus to be

involved in this area was spawned and nurtured by our initial association with the Society for Research in Adult Development SRAD with its origins some 15 years ago by Michael Commons and his associates in Cambridge Massachusetts Through the good will and support of this society we also became and are still heavily involved with the Journal of Adult Development and the Kluwer Plenum Monograph Series on Adult Development and Aging of which this volume is a companion Many of the contributions in the volume are from SRAD members who consistently adhere to a focus on positive adult development Their chapters have been complemented by pieces from other researchers who have adopted more mainstream approaches to adult development and aging Regardless of the particular approach and or focus of the chapter all the work reported herein supports the relatively recent idea that development is not restricted to children and adolescents but continues throughout the adult lifespan in ways that we never envisioned some 20 years ago Thus the volume represents state of the art theory research and practice on adult development which has the potential to occupy us all for some time to come
