Living Room Lectures Nina C. Leibman, 2010-07-22 With a breadwinner dad a homemaker mom and squeaky clean kids the 1950s television family has achieved near mythological status as a model of what real families ought to be Yet feature films of the period often portrayed families in trouble with parents and children in conflict over appropriate values and behaviors Why were these representations of family apparently so far apart Nina Leibman analyzes many feature films and dozens of TV situation comedy episodes from 1954 to 1963 to find surprising commonalities in their representations of the family Redefining the comedy as a family melodrama she compares film and television depictions of familial power gender roles and economic attitudes Leibman s explorations reveal how themes of guilt deceit manipulation anxiety and disfunctionality that obviously characterize such movies as *Rebel without a Cause* *A Summer Place* and *Splendor in the Grass* also crop up in such TV shows as *The Adventures of Ozzie and Harriet* *Father Knows Best* *Leave It to Beaver* *The Donna Reed Show* and *My Three Sons* Drawing on interviews with many of the participants of these productions archival documents and trade journals Leibman sets her discussion within a larger institutional history of 1950s film and television Her discussions shed new light not only on the reasons for both media s near obsession with family life but also on changes in American society as it reconfigured itself in the postwar era

Bandwagon Effects in High-technology Industries Jeffrey H. Rohlf, 2003 The theory of bandwagon effects in high technology industries illustrated by historical and contemporary case studies *All the News That's Fit to Sell* James T. Hamilton, 2011-10-23 That market forces drive the news is not news Whether a story appears in print on television or on the Internet depends on who is interested its value to advertisers the costs of assembling the details and competitors products But in *All the News That's Fit to Sell* economist James Hamilton shows just how this happens Furthermore many complaints about journalism media bias soft news and pundits as celebrities arise from the impact of this economic logic on news judgments This is the first book to develop an economic theory of news analyze evidence across a wide range of media markets on how incentives affect news content and offer policy conclusions Media bias for instance was long a staple of the news Hamilton's analysis of newspapers from 1870 to 1900 reveals how nonpartisan reporting became the norm A hundred years later some partisan elements reemerged as for example evening news broadcasts tried to retain young female viewers with stories aimed at their Democratic political interests Examination of story selection on the network evening news programs from 1969 to 1998 shows how cable competition deregulation and ownership changes encouraged a shift from hard news about politics toward more soft news about entertainers Hamilton concludes by calling for lower costs of access to government information a greater role for nonprofits in funding journalism the development of norms that stress hard news reporting and the defining of digital and Internet property rights to encourage the flow of news Ultimately this book shows that by more fully understanding the economics behind the news we will be better positioned to ensure that the news serves the public good Children's Television United States.
