*Shaky Ground* Elizabeth Marlowe, 2013-10-10 The recent crisis in the world of antiquities collecting has prompted scholars and the general public to pay more attention than ever before to the archaeological findspots and collecting histories of ancient artworks This new scrutiny is applied to works currently on the market as well as to those acquired since and despite the 1970 UNESCO Convention which aimed to prevent the trafficking in cultural property When it comes to famous works that have been in major museums for many generations however the matter of their origins is rarely considered Canonical pieces like the Barberini Togatus or the Fonseca bust of a Flavian lady appear in many scholarly studies and virtually every textbook on Roman art But we have no more certainty about these works archaeological contexts than we do about those that surface on the market today This book argues that the current legal and ethical debates over looting ownership and cultural property have distracted us from the epistemological problems inherent in all ostensibly ancient artworks lacking a known findspot problems that should be of great concern to those who seek to understand the past through its material remains

*A Corpus of Rembrandt Paintings VI* Ernst van de Wetering, 2014-11-11 A revised survey of Rembrandt's complete painted oeuvre The question of which 17th century paintings in Rembrandt's style were actually painted by Rembrandt himself had already become an issue during his lifetime It is an issue that is still hotly disputed among art historians today The problem arose because Rembrandt had numerous pupils who learned the art of painting by imitating their master or by assisting him with his work as a portrait painter He also left pieces unfinished to be completed by others The question is how to determine which works were from Rembrandt's own hand Can we for example define the criteria of quality that would allow us to distinguish the master's work from that of his followers Do we yet have methods of investigation that would deliver objective evidence of authenticity To what extent do research techniques used in the physical sciences help Or are we after all still dependent on the subjective expert eye of the connoisseur The book provides answers to these questions Prof Ernst van de Wetering the author of our forthcoming book which deals with these questions has been closely involved in all aspects of this research since 1968 the year the renowned Rembrandt Research Project RRP was founded In particular he played an important role in developing new criteria for authentication Van de Wetering was also witness to the way the often overly zealous tendency to doubt the authenticity of Rembrandt's paintings got out of hand In this book he re attributes to the master a substantial number of unjustly rejected Rembrandts He also was closely involved in the re discovery of a considerable number of lost or completely unknown works by Rembrandt The verdicts of earlier specialists including the majority of members of the original RRP up to 1989 were based on

connoisseurship the self confidence in one's ability to recognise a specific artist's style and hand Over the years Van de Wetering has carried out seminal research into 17th century studio practice and ideas about art current in Rembrandt's time In this book he demonstrates the fallibility of traditional connoisseurship especially in the case of Rembrandt who was par excellence a searching artist The methodological implications of this critical view are discussed in an introductory chapter which relates the history of the developments in this turbulent field of research Van de Wetering's account of his own involvement in it makes this book a lively and sometimes unexpectedly personal account The catalogue section presents a chronologically ordered survey of Rembrandt's entire painted oeuvre of 336 paintings richly illustrated and annotated For all the paintings re-attributed in this book extensive commentaries have been included that provide a multi-faceted new insight into Rembrandt's world and the world of art historical research Rembrandt's Paintings Revisited is the concluding sixth volume of A Corpus of Rembrandt Paintings Volumes I-V 1982 1986 1989 2005 2010 It can also be read as a revisionary critique of the first three Volumes published by the old RRP team up till 1989 and of Gerson's influential survey of Rembrandt's painted oeuvre of 1968-69 At the same time the book is designed as an independent overview that can be used on the basis that anyone seeking more detailed information will be referred to the five previous digital versions of the Volumes and the detailed catalogues published in the meantime by the various museums with collections of Rembrandt paintings This work of art history and art research should belong in the library of every serious art historical institute university or museum

*Edwardian Culture* Samuel Shaw, Sarah Shaw, Naomi Carle, 2017-11-22 Edwardian Culture Beyond the Garden Party is the first truly interdisciplinary collection of essays dealing with culture in Britain c 1895-1914 Bringing together essays on literature art politics religion architecture marketing and imperial history the study highlights the extent to which the culture and politics of Edwardian period were closely intertwined The book builds upon recent scholarship that seeks to reclaim the term Edwardian from prevalent restrictive usages by venturing beyond the garden party and the political rally to uncover some of the terrain that lies between The essays in the volume which deal with both famous writers such as J M Barrie and Arnold Bennett as well as many lesser known figures draw attention to the nuanced multiplicity of experience and cultural forms that existed during the period and highlight the ways in which a closer examination of Edwardian culture complicates our definitions of Victorian and Modern The book argues that the Edwardian era rather than constituting a coda to the Victorian period or a languid pause before modernism shook things up possessed a compelling and creative tenor of its own

*Money in the Air* Gail Feigenbaum, Sandra van Ginhoven, Edward Sterrett, 2024-06-25 This volume explores the crucial role of art dealers in creating a transatlantic art market in the late nineteenth and early twentieth centuries There was money in the air ever so much money wrote Henry James in 1907 reflecting on the American appetite for art acquisitions Indeed collectors such as Henry Clay Frick and Andrew W Mellon are credited with bringing noteworthy European art to the United States with their collections forming the backbone of major American museums today But what of the dealers who

possessed the expertise in art and recognized the potential of developing a new market model on both sides of the Atlantic

*Money in the Air* investigates the often overlooked role of these dealers in creating an international art world Contributors examine the histories of wellknown international firms like Duveen Brothers M Knoedler Co and Goupil Cie and their relationships with American clients as well as accounts of other remarkable dealers active in the transatlantic art market Drawing on dealer archives scholars reveal compelling findings including previously unknown partnerships and systems of cooperation This volume offers new perspectives on the development of art collections that formed the core of American art museums such as the National Gallery of Art the Metropolitan Museum of Art and the Frick Collection Italy for Sale,2023-08-14 In the late nineteenth and early twentieth centuries Italian Renaissance art objects and even the idea of Italy itself figured heavily both in the dynamic international art market and in the eyes of the general public The alternative objects that were actively dispersed and collected authentic works pastiches Renaissance inspired counterfeits and reproductions in the diverse media of paint plaster terracotta and photography had a tremendous impact on visual culture across social strata These essays examine less studied aspects of this market through the lens of just a few of the countless successful sales of objects out of Italy British Models of Art Collecting and the American Response Dr Inge Reist,2014-10-28 This collection of fourteen essays by distinguished art and cultural historians examine points of similarity and difference in British and American art collecting Half the essays examine the trends that dominated the British art collecting scene of the nineteenth century Others focus on American collectors using biographical sketches and case studies to demonstrate how collectors in the United States embellished the British model to develop their own often philanthropic approach to art collecting *Histories of Conservation and Art History in Modern Europe* Sven Dupré,Jenny Boulboulle,2022-03-14 This book traces the development of scientific conservation and technical art history It takes as its starting point the final years of the nineteenth century which saw the establishment of the first museum laboratory in Berlin and ground breaking international conferences on art history and conservation held in pre World War I Germany It follows the history of conservation and art history until the 1940s when from the ruins of World War II new institutions such as the Istituto Centrale del Restauro emerged which would shape the post war art and conservation world The book will be of interest to scholars working in art history conservation history historiography and history of science and humanities
