French Feminism in the 19th Century Claire G. Moses, 1985-06-30 Histories of France have erased the feminist presence from nineteenth century political life and the feminist impact from the changes that affected the lives of the French. Now French Feminism in the Nineteenth Century completes the history books by restoring this missing and vital chapter of French history. The book recounts the turbulent story of nineteenth century French feminism placing it in the context of the general political events that influenced its development. It also examines feminist thought and activities using the very words of the women themselves in books, newspapers, pamphlets, memoirs, diaries, speeches, and letters. Featured is a wealth of previously unpublished personal letters written by Saint Simonian women. These engrossing documents reveal the nuances of changing consciousness and show how it led to an autonomous women's movement. Also explored are the relationships between feminist ideology and women's actual status, legal, social, and economic during the century. Both bourgeois and working class women are surveyed. Beginning with a general survey of feminism in France, the book provides historical context and clarifies the later vicissitudes of the condition feminine.

France 1814 - 1914 Robert Tombs, 2014-09-25 Here is an incomparably rich portrait of France in the years when the disparate elements that made up the fragmented kingdom of the ancien regime were forged into the modern nation. The survey begins with an exploration of national obsessions and attitudes. It considers the tendency to revolution and war, the preoccupation with the idea of a New Order, and the deep strain of national paranoia that was to be intensified by the dramatic debacle of the Franco-Prussian War. Robert Tombs then investigates the structures of power, and in Part Three he turns his attention to social identities from the individual and family to the nation at large. When every aspect of the period

has been put under the microscope Robert Tombs draws them all into the broad political narrative that brings the book to its rousing conclusion Bursting with life as well as learning this is quite simply a tour de force Film and Community in Britain and France Margaret Butler, 2004-08-27 Relations between France and Britain have always been uneasy and ambivalent But in cinema WWII changed all that for a time Although the two countries wartime fortunes differed post war both were busy reintegrating returning servicemen and prisoners of war and accommodating the changed aspirations of women Margaret Butler examines these subjects and more in her comparative study of the cinemas of Britain and France during and after the war Using the concept of continuity she shows how cinema dealt directly with ideas of belonging and alienation inclusion and exclusion unity and division She also draws on contemporary debates and offers a perceptive reading of key films to reveal the meaning and appeal of French classics like *Les Enfants du Paradis* and notable British productions like *Waterloo Road* *Annales* Stuart Clark, 1999 This collection reprints key articles written within the past 30 years on the Annales school their journal their influence on history historiography and other academic fields **The Radical Bourgeoisie** Katherine Auspitz, Kate Auspitz, 2002-07-04 A reassessment of the role of French Radicals as thinkers and politicians *Lost Worlds* Jonathan Dewald, 2007-08-09 Today's interest in social history and private life is often seen as a twentieth century innovation Most often Lucien Febvre and the Annales school in France are credited with making social history a widely accepted way for historians to approach the past In *Lost Worlds* historian Jonathan Dewald shows that we need to look back further in time into the nineteenth century when numerous French intellectuals developed many of the key concepts that historians employ today According to Dewald we need to view Febvre and other Annales historians as participants in an ongoing cultural debate over the shape and meanings of French history rather than as inventors of new topics of study He closely examines the work of Charles Augustin Sainte Beuve Hippolyte Taine the antiquarian Alfred Franklin Febvre himself the twentieth century historian Philippe Ariès and several others A final chapter compares specifically French approaches to social history with those of German historians between 1930 and 1970 Through such close readings Dewald looks beyond programmatic statements of historians intentions to reveal how history was actually practiced during these years A bold work of intellectual history *Lost Worlds* sheds much needed light on how contemporary ideas about the historian's task came into being Understanding this larger context enables us to appreciate the ideological functions performed by historical writing through the twentieth century
