Second Language Conversations:

Second Language Conversations Rod Gardner, Johannes Wagner, 2005-12-07 This collection is the first to consistently adopt Conversation Analysis as an approach to second language interaction. By examining first and second language speakers' participation in a wide range of activities, it challenges the dominant view of nonnative speakers as deficient communicators. Proposing instead to understand second language users' conversational participation as interactional achievement, the book makes a powerful case for ethnomethodological respecification in second language research. Professor Gabriele Kasper, University of Hawai'i. Conversations involving speakers whose first language is not the language in which they are talking have become widespread in the globalized world. Migration, increased travel for business or pleasure, as well as communication through new technologies such as the internet, make Second Language Conversations an increasingly common everyday event. In this book, Conversation Analysis is used to explore natural casual talk between speakers in a second language. The contributors shift emphasis away from controlled contexts such as the classroom towards more sociable environments in which people go about their daily routines. English, German, French, Japanese, Finnish, and Danish are all analyzed as second languages within a variety of professional, educational, and sociable situations. This collection of essays aims to present naturally occurring Second Language Conversations in order to show what speakers in these situations do, how they utilize first language conversational practices, and whether or not grammar, vocabulary, and pronunciation help or hinder the construction of meaning.

Second Language Interaction Salla Kurhila, 2006-05-03 Members of divergent societies are increasingly involved in interactional situations, both publicly and privately, where participants do not share linguistic resources. Second language conversations have become common everyday events in the globalized world, and an interest has evolved to determine how interaction is conducted and understanding achieved in such asymmetric conversations. This book describes how mutual intelligibility is established, checked, and remedied in authentic interaction between first and second language speakers, both in institutional and everyday situations. The study is rooted in the interactional view on language and it contributes to our knowledge on interactional practices, in particular in cases where some doubt exists about the level of intersubjectivity between the participants. It expands the traditional research agenda of conversation analysis that is based on the concepts of membership and members' shared competences. By showing in detail how speakers with restricted linguistic resources can interact successfully and achieve the institutional goals of interactions, this study also adds to our knowledge of the questions that are central in second language research, such as when and how the non-native speakers' linguistic output is modified by themselves or by the native speakers, or when the non-native speakers display uptake after these modifications.

Online Second Language Acquisition Vincenza Tudini, 2010-10-07 A book-length exploration of the role of online chat in supporting the teaching and learning of foreign languages is well overdue. Tudini's new book takes a Conversation Analysis approach, which is new to online Second Language Acquisition. It

provides observable previously undocumented insights into how native speakers and learners pursue the learning of foreign language and culture during online text chat It looks at dyadic chat between native speakers and learners with examples drawn from a corpus featuring 133 learners and 584 native speakers of Italian This unique book contributes to our understanding of how conversation in a foreign language unfolds between native speakers and learners in an online social environment rather than in the classroom It will be of interest to researchers in second language acquisition and conversation analysis as well as language teachers

Toward Free Conversation and Communication in the Foreign Language Classroom Constance K. Knop, 1977 *Methodological Developments in Teaching Spanish as a Second and Foreign Language* Guadalupe Ruiz-Farjardo, 2012-11-16 This book on applied linguistics presents new trends and improvements on the teaching of Spanish It deals with two major scopes in the field of linguistics that have a crucial role in the development of language teaching in general and of the teaching of Spanish in particular Interaction and Grammar The topics chosen coincide with the areas in which the communicative approach to language teaching dominant in European and American language programs since the 1970s and 80s has been the object of most revision In its first part the book appeals both to pragmatics and to discourse analysis to research the specifics of classroom discourse and classroom interaction as well as the differences between interactions among Spanish native speakers and interactions among non natives in order to develop methodologies for the effective incorporation of these aspects to the Spanish language classroom such as tasks to teach interaction or techniques to implement learner centered interactive class dynamics and cooperative learning In its second part this book reviews the pedagogical advantages of language description based on Cognitive Linguistic theory to explain different aspects of Spanish grammar The main purpose of our contribution is to show how taking different dimensions of construal and perspective in linguistic representations into account helps teachers to elucidate idiosyncratic and subtle contrasts of Spanish structure that other views and approaches cannot clarify on a meaningful base such as the aspectual opposition between preterits or the modal opposition between indicative and subjunctive both of high importance for the English speaking student The work selected for this book by experts from Columbia University and from several universities in Spain represents the most current lines of inquiry in this post communicative approach as applied specifically to the teaching of Spanish This book seeks to be to be a must read for the present and future It tackles unexplored territory for journals and applied linguistics collections have mainly addressed these problems in relation to English language and instruction

Conversation Analysis and Language Alternation Anna Filipi, Numa Markee, 2018-10-15 This volume brings together researchers in conversation analysis who examine the practice of alternating between English and German Italian Spanish Swedish and Vietnamese in the classroom The collection shows that language alternation is integral to being and learning to become a bilingual and that being and learning to become a bilingual are accomplished through a remarkably common set of interactional objects and actions whose sequential organisations are quite similar across languages and educational sectors This volume therefore shows that having recourse to more than one shared language provides an important resource for getting the work of language learning and teaching done through an orderliness that can be described and evaluated The findings and the suggested pedagogical applications

described in the volume will be of significant interest to researchers and teachers in a range of fields including second and foreign language teaching and learning conversation analysis teacher education and bilingualism

L2 Interactional Competence and Development Joan Kelly Hall, John Hellermann, Simona Pekarek Doehler, 2011-07-18 Drawing on data from a range of contexts including classrooms pharmacy consultations tutoring sessions and video game playing and a range of languages including English German French Danish and Icelandic the studies in this volume address challenges suggested by these questions What kinds of interactional resources do L2 users draw on to participate competently and creatively in their L2 encounters And how useful is conversation analysis in capturing the specific development of individuals interactional competencies in specific practices across time Rather than treating participants in L2 interactions as deficient speakers the book begins with the assumption that those who interact using a second language possess interactional competencies The studies set out to identify what these competencies are and how they change across time By doing so they address some of the difficult and yet unresolved issues that arise when it comes to comparing actions or practices across different moments in time
