Second To None History Of No2 Squadron:

Swift Justice Nigel Walpole, 2004-01-16 The Supermarine Swift was rushed into service with the RAF during 1954 to become Britain's first second generation jet fighter. In this role it was not deemed a success and has been burdened with a bad reputation since that time. It was eventually replaced by the famous Hawker Hunter that had been extensively delayed because of teething troubles. This book covers the development and operational history of a vital aircraft that is a part of aviation legend. *Air University Library Index to Military Periodicals*, 1997 **Catalogue of the Library of the Royal United Service Institution** Royal United Service Institution (Great Britain). Library, 1908 **From Sapper to Spitfire Spy** Sally-Anne Greville Heygate, 2015-08-31 David Greville Heygate was one of the few men who served in both the army and the Royal Air Force during the Second World War but it was in the sky that he really earned his stripes. Stalking the skies flying photo reconnaissance missions with No 16 Squadron over Northern France he was to win the illustrious and highly coveted Distinguished Flying Cross DFC. Another highlight saw him in action in the skies above the French coastline in preparation for the D Day landings taking photographs that would provide the allies with essential intelligence upon which to base their plans. Based in Holland in December 1944 David flew armed reconnes with No 168 Squadron then transferred to No 2 Squadron where he reported on troop movements behind German lines. During the course of a dynamic and eventful career he flew a wide variety of iconic wartime aircraft including Lysanders Mustangs Typhoons and Spitfires in England the Netherlands and Germany. Although there have been many stories about the Battle of Britain there has been less published about the life of a photo reconnaissance pilot during this time. David's thrilling exploits in the sky and the part he played within the context of the wider war are enlivened here to great effect by his daughter Sally Anne Greville Heygate herself a professional photographer. Using snippets from diary entries letters logbooks squadron records and other documents she has managed to construct an engaging history of a talented photo reconnaissance pilot and the war in which he fought.

Gunfire! Stig H. Moberg, 2017-03-30 This book provides an insight into how artillery resources were established developed and employed during the Second World War using the British Royal Artillery as an example. Beginning with an overview of the nature and state of readiness of the Royal Artillery on the outbreak of war the book analyses in great detail the weapons available to the Royal Artillery their technical functionality and their performance capabilities. With this knowledge the author then examines the organization methods procedures and tactics employed by the Royal Artillery. To complete this fascinating study Stig Moberg looks at a number of key battles from the war to see how the artillery was used and the effectiveness of its support to the British and Allied infantry in campaigns in North Africa Burma and Europe. British Artillery of the Second World War is profusely illustrated throughout with photographs maps plans graphs charts and diagrams to demonstrate precisely how the British Artillery was used on the battlefields around the world. Although I am an infantryman and proud of it I have many times said that the Royal Regiment of Artillery in my opinion did more to win the last

The Neptune Factor Nicholas A. Lambert, 2024-02-15 Winner of the 2024 Samuel Eliot Morison Award for Naval Literature The Neptune Factor is the biography of an idea the concept of Sea Power a term first coined by Capt A T Mahan and the core thread of his life's work His central argument was that the outcome of rivalries on the seas have decisively shaped the course of modern history Although Mahan's scholarship has long been seen as foundational to all systematic study of naval power Neptune Factor is the first attempt to explain how Mahan's definition of sea power shifted over time Far from presenting sea power in terms of combat as often thought Mahan conceptualized it in terms of economics Proceeding from the conviction that international trade carried across the world's oceans was the single greatest driver of national wealth and thus power in history Mahan explained sea power in terms of regulating access to the common and influencing the flows of trans-oceanic trade A nation possessing sea power could not only safeguard its own trade and that of its allies but might also endeavor to deny access to the common to its enemies and competitors A pioneering student of what is now referred to as the first era of globalization lasting from the late nineteenth century until the First World War Mahan also identified the growing dependence of national economies upon uninterrupted access to an interconnected global trading system Put simply access to the common was essential to the economic and political stability of advanced societies This growing dependence Mahan thought increased rather than decreased the potency of sea power Understanding the critical relationship between navies and international economics is not the only reason why Mahan's ideas remain or rather have once again become so important He wrote in and of a multi-polar world when the reigning hegemon faced new challenges and confusion and uncertainty reigned as the result of rapid technological change and profound social upheaval Mahan believed that the U S Navy owed the American people a compelling explanation of why it deserved their support and their money His extensive deeply informed and highly sophisticated body of work on sea power constituted his attempt to supply such an explanation Mahan remains as relevant and needed today as he was more than a century ago
