Mass Unemployment:

Permanent Mass Layoffs and Plant Closings ,1987 *Report on Mass Layoffs and Plant Closings in ...* ,1986

Permanent Mass Layoffs and Plant Closings ,1987 ,1988 *Employment Security Review* ,1940 *Unemployment's Shocking Truth* Jack Stone,2008-06-03 About the Book This book does not take a neutral stand on the issue of mass unemployment It is an effort to expose capitalism s most outrageous feature its compulsive need to use unemployment and the fear of unemployment to ensure the docility and subservience of its workers Under the capitalist system the stick of the fear of unemployment is necessary to keep workers noses to the grindstone and make them perform to the satisfaction of their employers The stick is needed because much work is boring the carrot paid is less than a living wage provides workers very little or no control over the work process and stifles creativity in short because the total carrot offered to numerous workers is so woefully inadequate Under a different system one in which working people participated fully in the decisions affecting what how and for what purpose goods and services were produced if we had a system based on economic democracy there would be no need to use the stick of the fear of unemployment The creativity of most of the millions of working people now mostly dormant would be awakened and the volume and quality of improvements and inventions especially in housing energy transit systems and health care would be so great as to tower high above and completely overshadow the number and purpose of the innovations created under the present system The issue of unemployment is shrouded in half truths and outright lies As a result there is almost total ignorance about the real causes of unemployment and worse still about its very serious consequences Many claim that there are enough jobs but that the unemployed are lazy and would rather be on welfare While this may be true of a very small fraction of the unemployed it is not true of the overwhelming majority There have been numerous instances in which whenever advertisements calling for applicants for relatively well paid jobs or for jobs that paid better than the minimum wage the number of applicants that applied for those jobs were ten or more times greater than the number of jobs that were advertised In September 26th of 1984 to mention just one instance the Associated Press News Agency reported that 50 000 people lined up for 350 jobs The report went on to say that the applicants some of whom waited in line for two days hope to land a longshoreman s job paying 15 45 an hour or a marine clerk s job earning 17 45 an hour However the fact that only 350 jobs are currently available didn t dismay the crowd which queued up in a line in the San Pedro district of Los Angeles that stretched for 13 mile Clearly the majority would rather have gainful employment at a living wage and live a life of dignity and integrity Furthermore apart from the simple need to earn a living productive employment is an indispensable part of the psychological makeup of human beings Simply put people want to feel useful Prolonged joblessness is a serious threat to a person s self esteem and destroying that self esteem has appalling consequences The ugly truth is that the system under which we live will not or cannot provide jobs for those who need them The business class is simply not interested in full employment because mass unemployment provides

them with many benefits Among those benefits a large pool of unemployed workers drives down the wages employers have to pay

From the American System to Mass Production, 1800-1932: The Development of Manufacturing Technology in the United States David Hounshell, 2023-11-25

In *From the American System to Mass Production* David A Hounshell has provided a detailed thoughtful and comprehensive examination of American industrial technology from the early 1800s through the 1930s Lavishly illustrated with 19th century prints and more recent photographs of factory interiors and industrial products this important work traces the direct and indirect routes down the road toward modern American industrial civilization For business and labor historians and for historians of American technology and industrialization Hounshell s book will fill many gaps in the history of the technical contours of modern industrial America the book begins with an examination of the origins of the American system of manufactures in government and private arms production and then moves to the sewing machine woodworking agricultural equipment bicycle and automobile industries It touches on the important inventors and innovators and describes their fundamental contributions in these American industries Most of the principal figures and institutions are covered Simeon North Eli Whitney Thomas Blanchard John H Hall and Samuel Colt in armories Eli Terry and Seth Thomas in the clockmaking industry the Wheeler and Wilson Willcox and Gibbs and Singer sewing machine firms the Singer woodworking plant the McCormick Reaper works the Columbia Pope and Western Wheel Works bicycle companies and the Ford and General Motors automotive corporations Hounshell s work is a major contribution to the social history of technical innovators and their innovations All in all *From the American System to Mass Production* is an impressive work In his documentation of the history of American industrial technology Hounshell has demonstrated the slow evolution and the near failure of large scale capital intensive and work degrading industrial systems Whereas other historians of technology have tended to tread too lightly on the social dimensions of technical change Hounshell has provided an excellent social analysis of the networks of innovators and their role in the diffusion of armory practices and other industrial advances from industry to industry

Technology and Culture Mr Hounshell is an enthusiastic lively writer yet very careful scholar He is cautious in his conclusions and candid about what is debatable He offers several sides of every issue he does not judge particular technologies as good or bad What stands out in this history is how slowly what appears to be a sensible productive and efficient system of manufacturing was adopted chiefly because it required a change in the mind set of managers changes in skills and work habits of workers and disciplined procedures and practices throughout the plants

New York Times Book Review David Hounshell s history of the evolution of American production methods has few rivals in execution of the theme it has none Hounshell carefully documents the development transfer and modification of the technology of the manufacture of interchangeable parts from firm to firm and industry to industry A series of excellent technical photographs and Hounshell s own field trials support his argument

Science A meticulous study of mass production s roots and early flowering An able researcher Hounshell follows the trail of early manufacturing ideas and shows how they were gradually perfected and

diffused throughout different industries before converging in Ford's miracle at Highland Park Wall Street Journal An important study which offers a convincing reinterpretation of the development of mass production in the United States Hounshell has combined substantial new archival research with a synthesis of the mass of new work completed by others in the past three decades Journal of Economic History *Journal of the Senate, Legislature of the State of California* California. Legislature. Senate, 1942 Some Still More Equal Than Others? Serdar M. Degirmencioglu, Council of Europe, 2011-01-01 Inequality limits young people's chances in life Yet equality is the basis of democracy and Article 14 of the European Convention on Human Rights secures the rights and freedoms of the young without discrimination on any ground Research shows that inequality in opportunities wealth or health for example is widespread in Europe and that the citizens of richer countries do not necessarily have healthier profiles than those of poorer countries The citizens of egalitarian countries on the other hand have the highest life expectancy This book examines many aspects of inequality and opportunity for young people including schooling employment social exclusion labour migration trafficking disability cultural and religious discrimination youth work and opposition and resistance Bulletin of the United States Bureau of Labor Statistics, 1988 **Area Wage Survey**, 1988
