

The background of the slide is a 3D perspective view of a Go board. The board is a grid of squares, with some squares being black and others white. Several Go stones are placed on the board. There are black stones, white stones, and some stones that are colored green and blue. The stones are arranged in a way that suggests a game in progress. The text "Mathematical Foundations of Parallel Computing" is overlaid on the top left of the board.

Mathematical Foundation Of Parallel Computing:

Mathematical Foundations of Parallel Computing Valentin V. Voevodin, 1992 Parallel implementation of algorithms involves many difficult problems In particular among them are round off analysis the way to convert sequential programs and algorithms into the parallel mode the choice of appropriate or optimal computer architect and so on To solve these problems it is necessary to know very well the structure of algorithms This book deal with the mathematical mechanism that permits us to investigate structures of both sequential and parallel algorithms This mechanism allows us to recognize and explain the relations between different methods of constructing parallel algorithms the methods of analysing round off errors the methods of optimizing memory traffic the methods of working out the fastest implementation for a given parallel computer and other methods attending the joint investigation of algorithms and computers
