Mathematical development depends on children becoming confident and competent in learning and using key skills.

This area of learning includes counting, sorting, matching, seeking patterns, making connections, recognising relationships and working with numbers, shapes, space and measures.

The following images give ideas and examples of how early years practitioners around the country are supporting this area of learning in their outdoor environment.

Text and captions sourced from Curriculum Guidance for the Foundation Stage

Mathematical understanding should be developed through stories, songs, games and imaginative play, so that children enjoy using and experimenting with numbers.
