**Making Presentation Math Computable** André Greiner-Petter, 2022-12-31 This Open Access book addresses the issue of translating mathematical expressions from LaTeX to the syntax of Computer Algebra Systems CAS Over the past decades especially in the domain of Sciences Technology Engineering and Mathematics STEM LaTeX has become the de facto standard to typeset mathematical formulae in publications Since scientists are generally required to publish their work LaTeX has become an integral part of today's publishing workflow On the other hand modern research increasingly relies on CAS to simplify manipulate compute and visualize mathematics However existing LaTeX import functions in CAS are limited to simple arithmetic expressions and are therefore insufficient for most use cases Consequently the workflow of experimenting and publishing in the Sciences often includes time consuming and error prone manual

conversions between presentational LaTeX and computational CAS formats To address the lack of a reliable and comprehensive translation tool between LaTeX and CAS this thesis makes the following three contributions First it provides an approach to semantically enhance LaTeX expressions with sufficient semantic information for translations into CAS syntaxes Second it demonstrates the first context aware LaTeX to CAS translation framework LaCAsT Third the thesis provides a novel approach to evaluate the performance for LaTeX to CAS translations on large scaled datasets with an automatic verification of equations in digital mathematical libraries This is an open access book     *Computers Helping People With Special Needs* Klaus Miesenberger,2006-06-29 This book constitutes the refereed proceedings of the 10th International Conference on Computers Helping People with Special Needs ICCHP 2006 held in Linz Austria in July 2006 The 193 revised contributions presented were carefully reviewed and selected for inclusion in the book The papers evaluate how various fields in computer science can contribute to helping people with various kinds of disabilities and impairment     *The Shaping of Deduction in Greek Mathematics* Reviel Netz,2003-09-18 The aim of this book is to explain the shape of Greek mathematical thinking It can be read on three levels as a description of the practices of Greek mathematics as a theory of the emergence of the deductive method and as a case study for a general view on the history of science The starting point for the enquiry is geometry and the lettered diagram Reviel Netz exploits the mathematicians practices in the construction and lettering of their diagrams and the continuing interaction between text and diagram in their proofs to illuminate the underlying cognitive processes A close examination of the mathematical use of language follows especially mathematicians use of repeated formulae Two crucial chapters set out to show how mathematical proofs are structured and explain why Greek mathematical practice manages to be so satisfactory A final chapter looks into the broader historical setting of Greek mathematical practice     **Trends and Advances in Information Systems and Technologies** Álvaro Rocha,Hojjat Adeli,Luís Paulo Reis,Sandra Costanzo,2018-03-24 This book includes a selection of papers from the 2018 World Conference on Information Systems and Technologies WorldCIST 18 held in Naples Italy on March27 29 2018 WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations current trends professional experiences and the challenges of modern information systems and technologies research together with their technological development and applications The main topics covered are A Information and Knowledge Management B Organizational Models and Information Systems C Software and Systems Modeling D Software Systems Architectures Applications and Tools E Multimedia Systems and Applications F Computer Networks Mobility and Pervasive Systems G Intelligent and Decision Support Systems H Big Data Analytics and Applications I Human Computer Interaction J Ethics Computers K Health Informatics L Information Technologies in Education M Information Technologies in Radiocommunications N Technologies for Biomedical Applications     **Intelligent Computer Mathematics** Serge Autexier,2008-07-16 This book constitutes the joint refereed proceedings of the 9th International Conference on Artificial Intelligence and Symbolic Computation AISC

**Computers Helping People with Special Needs** Joachim Klaus, Klaus Miesenberger, Dominique Burger, Wolfgang Zagler, 2011-04-05 The introduction to the 1st International Conference on Computers for Handicapped Persons Vienna 1989 by AMinTjoa University of Vienna and Roland Wagner University of Linz nished with the following mission statement on the Future Direction on Computers for Handicapped Persons The different themes show that a lot of problems are solved by the usage of computer technology for helping handicapped persons for instance for the blind and visually handicapped A consequence of the discussed themes there are two directions which should be done in the next years One direction is obvious The tools must be improved and research and development work should be extended to all groups of handicapped even if they are numerically not so large as for instance the blind or visually handicapped persons On the other side in the area of social implications there is an increasing demand on social science studies on overall computer use among disabled persons Because sources are in principle missing today about disabled persons work tasks research in this field must begin by trying to survey this aspect

Particular attention should be paid to the extent and character of computer use among the handicapped in work life There are a lot of questions which should be answered during the next years for reaching the aim of rehabilitation Fifteen years later the 9th International Conference on Computers Helping People with Special Needs Paris 2004 offered a comprehensive and deepened view on general awareness special research and individual applications concerning disabled people and their participation in our society

On the Threshold of Knowing Lucia Rainer, 2017-04-15 In this in depth analysis of artistic and academic lectures and performances Lucia Rainer features an innovative conceptual and methodological tool that augments Goffman's Frame Analysis with a praxeological perspective This way she gives profound insight into how knowledge as a practice and a concept is associated with clarity rather than truth Based on four case studies including John Cage's unpublished and unabridged audio recording of Lecture on Nothing the study explores how the concept of lecture performances which adheres to two frames that never entirely blend provides a space to renegotiate the artistic academic relationship
