 2025,2013-05-13 The mathematical sciences are part of nearly all aspects of everyday life the discipline has underpinned
 such beneficial modern capabilities as Internet search medical imaging computer animation numerical weather predictions
 and all types of digital communications The Mathematical Sciences in 2025 examines the current state of the mathematical
 sciences and explores the changes needed for the discipline to be in a strong position and able to maximize its contribution to
 the nation in 2025 It finds the vitality of the discipline excellent and that it contributes in expanding ways to most areas of
 science and engineering as well as to the nation as a whole and recommends that training for future generations of
 mathematical scientists should be re assessed in light of the increasingly cross disciplinary nature of the mathematical
 sciences In addition because of the valuable interplay between ideas and people from all parts of the mathematical sciences
 the report emphasizes that universities and the government need to continue to invest in the full spectrum of the
 mathematical sciences in order for the whole enterprise to continue to flourish long term **"The Mathematical Sciences
