Mathematical Modelling of Aerospace Dynamic Systems with Practical Applications Jitendra R. Raol, V.P.S. Naidu, 2025-03-18 Mathematical Modelling of Aerospace Dynamic Systems with Practical Applications provides mathematical models for several aerospace dynamic systems aircraft rotorcraft missiles unmanned aerial vehicles UAVs mini air vehicles MAVs autonomous underwater vehicles AUWVs and satellite coordinate systems Presenting the use of mathematical models for analysis prediction and control of these systems this book discusses numerous applications in aircraft helicopter parameter estimation guidance and navigation of these vehicles underwater object search aerial terrain mapping and satellite orbit determination It explains path planning with obstacle avoidance object occlusion detection and tracking and multisensory target tracking and sensor data fusion This book is intended for senior undergraduate mechanical and aerospace engineering students taking courses in aerospace systems and dynamics flight dynamics and control and dynamical systems and estimation Instructors will be able to utilize a Solutions Manual and Figure Slides for their course

Theoretical Methods, Algorithms, and Applications of Quantum Systems in Chemistry, Physics, and Biology Sourav Pal, Vipin Srivastava, Vidya Avasare, Jean Maruani, 2025-08-21 This volume contains peer reviewed contributions based on talks presented at the 26th International Workshop on Quantum Systems in Chemistry Physics and Biology held in Jaipur India in October 2023 It provides an in depth discussion of methodological approaches that are relevant across various length scales elucidating their applications in diverse chemical and biological systems such as catalysis and materials Authored by experts in their respective fields each chapter showcases recent developments and offers insights into the latest research trends This book is aimed at advanced graduate students academics and researchers both in university and corporation laboratories interested in state of the art and novel trends in quantum chemistry physics and biology and their applications

Smart Applications and Sustainability in the AIoT Era Fadi Al-Turjman, 2024-12-26 This book gathers recent research work on emerging Artificial Intelligence AI methods for processing and storing data generated by smart infrastructures Smart infrastructures gather Terabytes of data nowadays with no need for traditional control The data automatically uploads to the cloud computing platform The cloud analyses the data and generates the required output in visualization graph and action A remote access network can be constructed dependent on either low elevation or high altitude stages When associated with satellite and earthly frameworks these stages empower a far reaching access network with worldwide inclusion and diverse administration provisioning Data analytics are used in agriculture mining waste management energy and military defenses Major topics covered include the analysis and

development of AI powered mechanisms in future IoT and smart infrastructures applications Further the book addresses new technological developments current research trends and industry needs Presenting case studies experience and evaluation reports and best practices in utilizing AI applications in IoT networks it strikes a good balance between theoretical and practical issues It also provides technical scientific information on various aspects of AI technologies ranging from basic concepts to research grade material including future directions The book is intended for researchers practitioners engineers and scientists involved in the design and development of protocols and AI applications for smart and sustainable infrastructure related devices
