A Decade of Middle School Mathematics Curriculum Implementation Margaret R. Meyer, Cynthia W. Langrall, 2008-12-01
Associate Editors Fran Arbaugh University of Missouri Columbia David C Webb University of Colorado at Boulder and Murrel Brewer Hoover WVSTEM Center Marshall University The purpose of this book is to document the work of the Show Me Project 1997 2007 and to highlight lessons learned about curriculum implementation Although the Show Me Project was charged with promoting the dissemination and implementation of four distinct comprehensive curriculum programs Connected Mathematics Mathematics in Context MathScape and MathThematics most of the lessons learned from this work are not curriculum specific Rather they cut across the four programs and share commonalities with standards based curriculum reform at any level We believe that documenting these lessons learned will be one of the legacies of the Show Me Project We anticipate that the comprehensive nature of this work will attract readers from multiple audiences that include state and district mathematics supervisors middle grades mathematics teachers and administrators involved in curriculum reform as well as mathematics teacher educators Those about to embark on the review of curriculum materials will appreciate reading about the processes employed by other districts Readers with interests in a particular curriculum program will be able to trace the curriculum specific chapters to gain insights into how the design of the curricula relate to professional development adoption and implementation issues and teachers personal experience using the curriculum materials Individuals who provide professional development at the middle grades level will find chapters that they can use for both general and focused discussions Teachers at all stages of implementation will recognize their own experiences in reading and reflecting on the stories of teacher change Mathematics educators will find ideas on how these curricula can be used in the preparation of preservice middle grades teachers

Mathematics and Science Curriculum Programs, 2002 *Math Wars* Carmen Latterell, 2004-12-30
This book is written for parents and other interested parties so that they can understand the great debate taking place in many states in this country about how to teach basic math The debate centers around the standards written by the National Council of Teachers of Mathematics NCTM which call for a radically different approach to mathematics education Because the issues are so heated between the NCTM oriented curricula and traditional curricula the curricula that NCTM oriented

replaced the term Math Wars was coined to describe them Parents are concerned about their children s math learning Teachers are concerned about math teaching When parents see what children are bringing home under the new curriculum it is clear that their children are not working on the same mathematics that parents remember from the time when they were in school But the problem goes beyond grades K 12 Post secondary mathematics courses are the fear of many students The standards created by the NCTM do not necessarily prepare students for success either on SATs or in college Besides lack of knowledge about mathematics education many parents have an additional problem in that they feel they lack knowledge in mathematics itself This is very intimidating thus it is difficult for parents to do anything about the confusing state of mathematics education This book provides some answers Curriculum Summaries ,1998 *MathScape* ,1998 *Focus a Magazine for Innovators* ,1999 **Teaching Secondary and Middle School Mathematics** Daniel J. Brahier,2009 In this extensively revised third edition of Teaching Secondary and Middle School Mathematics scholar and classroom teacher Daniel Brahier presents concise current and meaningful descriptions of what it takes to be an effective teacher of mathematics With up to date research classroom tested teaching ideas and a vibrant writing style this book provides essential information on curriculum teaching and assessment issues related to middle secondary mathematics Every chapter includes a contextualizing introduction scenarios and dialogues for student reflection recommended resources for further study and closing activities and discussion questions to cement chapter concepts Jacket *Educational Leadership* ,1943
