Matters Of Conflict Material Culture Memory And The First World War:

Matters of Conflict Nicholas J. Saunders, 2004 *Matters of Conflict* looks at the definitive invention of the twentieth century industrialised war and its vast and varied material legacy From trench art and postcards through avant garde art museum collections and prosthetic limbs to battlefield landscapes the book examines the First World War and its significance through the things it left behind The contributions come from a multidisciplinary perspective uniting previously compartmentalized disciplines such as anthropology archaeology cultural history museology and art history in their focus on material culture This innovative hybrid approach investigates the social life of objects in order to understand them as they move through time and space and intersect the lives of all who came in contact with them The resulting survey sets a new agenda for study of the First World War and ultimately of all twentieth century conflict

The Archaeology of the Royal Flying Corps Melanie Winterton, 2022-10-07 Winterton's book is a good introductory effort on the haptic environment of World War I aviators and their personal artifacts The *Journal of the Air Force Historical Foundation Archaeology* provides a fascinating insight into the lives of the aviators of the First World War Their descriptions of the sensation of flying in the open cockpits of the primitive warplanes of the day and the artifacts that have survived from these first years of aerial combat give us a powerful sense of what their wartime service was like and chart the beginning of our modern understanding of aviation But the subject hasn't been explored in any depth before which is why Melanie Winterton's pioneering book is so timely Hers is the first study of the trench art souvenirs and lucky mascots associated with the Royal Flying Corps which in an original way tell us so much about the experience of flying on the Western Front a century ago Extensive quotations from the memoirs of these early airmen are combined with an analysis of the artifacts themselves They convey something of the fear and anxiety the airmen had to grapple with on a daily basis and bring out the full significance of the poignant souvenirs they left behind Pieces of crashed aeroplane wooden propellers strips of linen fragments of metal were recycled and circulated during the war and afterwards became the focus of attention in the domestic home As Melanie Winterton demonstrates these items connected the living with the deceased which is why they are so strongly evocative even today

The Short Story and the First World War Ann-Marie Einhaus, 2013-07-31 The poetry of the First World War has come to dominate our understanding of its literature while genres such as the short story which are just as vital to the literary heritage of the era have largely been neglected In this study Ann Marie Einhaus challenges deeply embedded cultural conceptions about the literature of the First World War using a corpus of several hundred short stories that until now have not undergone any systematic critical analysis From early wartime stories to late twentieth century narratives and spanning a wide spectrum of literary styles and movements Einhaus's work reveals a range of responses to the war through fiction from pacifism to militarism Going beyond the household names of Owen Sassoon and Graves Einhaus offers scholars and students unprecedented access to new frontiers in twentieth century literary studies
