### **Acrobatic Modernism from the Avant-Garde to Prehistory** Jed Rasula, 2020-02-27

This is a book about artistic modernism contending with the historical transfigurations of modernity As a conscientious engagement with modernity's restructuring of the lifeworld the modernist avant garde raised the stakes of this engagement to programmatic explicitness But even beyond the vanguard the global phenomenon of jazz combined somatic assault with sensory tutelage Jazz like the new technologies of modernity re calibrated sensory ratios The criterion of the new as self making also extended to names pseudonyms and heteronyms The protocols of modernism solicited a pragmatic arousal of bodily sensation as artistic resource validating an acrobatic sensibility ranging from slapstick and laughter to the pathos of bereavement Expressivity trumped representation The artwork was a diagram of perception not a mimetic rendering For artists the historical pressures of altered perception provoked new models and Ezra Pound's slogan Make It New became the generic rallying cry of renovation The paradigmatic stance of the avant garde was established by Futurism but the discovery of prehistoric art added another provocation to artists Paleolithic caves validated the spirit of all over composition unframed and dynamic Geometric abstraction Constructivism and Purism and Surrealism were all in quest of a new mythology Making it new yielded a new pathos in the sensation of radical discrepancy between futurist striving and remotest antiquity The Paleolithic cave and the USSR emitted comparable siren calls on behalf of the remote past and the desired future As such the

present was suffused with the pathos of being neither but subject to both      The Spatiality of the Hispanic Avant-Garde Claudio Palomares-Salas, 2020-06-08 The Spatiality of the Hispanic Avant Garde Ultra smo Estridentismo 1918 1927 is a thorough exploration of the meanings and values Hispanic poets and artists assigned to four iconic locations of modernity the city the caf s means of transportation and the sea during the first decades of the 20th century Joining important studies on Spatiality Palomares Salas convincingly argues that an unsolvable tension between place and space is at the core of the Hispanic avant garde cultural production A refreshing transatlantic perspective on Ultraism and Stridentism the book moves the Hispanic vanguards forward into broader international discussions on space and modernism and offers innovative readings of well known as well as rarely studied works      **Delirious Consumption** Sergio Delgado Moya, 2017-10-11 In the decades following World War II the creation and expansion of massive domestic markets and relatively stable economies allowed for mass consumption on an unprecedented scale giving rise to the consumer society that exists today Many avant garde artists explored the nexus between consumption and aesthetics questioning how consumerism affects how we perceive the world place ourselves in it and make sense of it via perception and emotion Delirious Consumption focuses on the two largest cultural economies in Latin America Mexico and Brazil and analyzes how their artists and writers both embraced and resisted the spirit of development and progress that defines the consumer moment in late capitalism Sergio Delgado Moya looks specifically at the work of David Alfaro Siqueiros the Brazilian concrete poets Octavio Paz and Lygia Clark to determine how each of them arrived at forms of aesthetic production balanced between high modernism and consumer culture He finds in their works a provocative positioning vis vis urban commodity capitalism an ambivalent position that takes an assured but flexible stance against commodification alienation and the politics of domination and inequality that defines market economies In Delgado Moya s view these poets and artists appeal to uselessness nonutility and noncommunication all markers of the aesthetic while drawing on the terms proper to a world of consumption and consumer culture      *Handbook of International Futurism* Günter Berghaus, 2018-12-17 The Handbook of International Futurism is the first reference work ever to presents in a comparative fashion all media and countries in which the movement initiated by F T Marinetti in 1909 exercised a particularly noteworthy influence The handbook offers a synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty eight countries While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia it treats Futurism as an international multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth century avant garde Hundreds of artists who in some phase in their career absorbed Futurist ideas and stylistic devices are presented in the context of their national traditions their international connections and the media in which they were predominantly active The handbook acts as a kind of multi disciplinary geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement

had a major impact      **Exploring Materiality and Connectivity in Anthropology and Beyond** Philipp Schorch, Martin Saxer, Marlen Elders, 2020-03-30 Exploring Materiality and Connectivity in Anthropology and Beyond provides a new look at the old anthropological concern with materiality and connectivity It understands materiality not as defined property of some thing nor does it take connectivity as merely a relation between discrete entities Somewhat akin to Heisenberg's uncertainty principle it sees materiality and connectivity as two interrelated modes in which an entity is or more precisely is becoming in the world The question thus is how these two modes of becoming relate and fold into each other Throughout the four year research process that led to this book the authors approached this question not just from a theoretical perspective taking the suggestion of thinking through things literally and methodologically seriously the first two workshops were dedicated to practical hands on exercises working with things From these workshops a series of installations emerged straddling the boundaries of art and academia These installations served as artistic academic interventions during the final symposium and are featured alongside the other academic contributions to this volume Throughout this process two main themes emerged and structure Part II Movement and Growth and Part III Dissolution and Traces of the present volume respectively Part I Conceptual Grounds consists of two chapters offering conceptual takes on things and ties one from anthropology and one from archaeology As interrelated modes of becoming materiality and connectivity make it necessary to coalesce things and ties into thing ties an insight toward which the chapters and interventions came from different sides and one in which the initial proposition of the editors still shines through Throughout the pages of this volume we invite the reader to travel beyond imaginaries of a universe of separate planets united by connections and to venture with us instead into the thicket of thing ties in which we live      2017 Mariana Aguirre, Rosa Sarabia, Renée M. Silverman, Ricardo Vasconcelos, 2017-04-24 Futurism Studies in its canonical form has followed in the steps of Marinetti's concept of Futurisme mondial according to which Futurism had its centre in Italy and a large number of satellites around Europe and the rest of the globe Consequently authors of textbook histories of Futurism focus their attention on Italy add a chapter or two on Russia and dedicate next to no attention to developments in other parts of the world Futurism Studies tends to see in Marinetti's movement the font and mother of all subsequent avant gardes and deprecates the non European variants as mere derivatives Vol 7 of the International Yearbook of Futurism Studies will focus on one of these regions outside Europe and demonstrate that the heuristic model of centre periphery is faulty and misleading as it ignores the originality and inventiveness of art and literature in Latin America Futurist tendencies in both Spanish and Portuguese speaking countries may have been in part influenced by Italian Futurism but they certainly did not derive from it The shift towards modernity took place in Latin America more or less in parallel to the economic progress made in the underdeveloped countries of Europe Italy and Russia have often been described as having originated Futurism because of their backwardness compared to the industrial powerhouses England Germany and France According to this narrative Spain and Portugal occupied a position of semi

periphery They had channelled dominant cultural discourses from the centre nations into the colonies However with the rise of modernity and the emergence of independence movements cultural discourses in the colonies undertook a major shift The revolt of the European avant garde against academic art found much sympathy amongst Latin American artists as they were engaged in a similar battle against the canonical discourses of colonial rule One can therefore detect many parallels between the European and Latin American avant garde movements This includes the varieties of Futurism to which Yearbook 2017 will be dedicated In Europe the avant garde had a complex relationship to tradition especially its primitivist varieties In Latin America the avant garde also sought to uncover and incorporate alternative i e indigenous traditions The result was a hybrid form of art and literature that showed many parallels to the European avant garde but also had other sources of inspiration Given the large variety of indigenous cultures on the American continent it was only natural that many heterogeneous mixtures of Futurism emerged there Yearbook 2017 explores this plurality of Futurisms and the cultural traditions that influenced them Contributions focus on the intertextual character of Latin American Futurisms interpret works of literature and fine arts within their local setting consider modes of production and consumption within each culture as well as the forms of interaction with other Latin American and European centres 14 essays locate Futurism within the complex network of cultural exchange unravel the Futurist contribution to the complex interrelations between local and the global cultures in Latin America and reveal the dynamic dialogue as well as the multiple forms of cross fertilization that existed amongst them

**Public Spectacles of Violence** Rielle Navitski, 2017-05-18 In Public Spectacles of Violence Rielle Navitski examines the proliferation of cinematic and photographic images of criminality bodily injury and technological catastrophe in early twentieth century Mexico and Brazil which were among Latin America's most industrialized nations and later developed two of the region's largest film industries Navitski analyzes a wide range of sensational cultural forms from nonfiction films and serial cinema to illustrated police reportage serial literature and fan magazines demonstrating how media spectacles of violence helped audiences make sense of the political instability high crime rates and social inequality that came with modernization In both nations sensational cinema and journalism influenced by imported films forged a common public sphere that reached across the racial class and geographic divides accentuated by economic growth and urbanization Highlighting the human costs of modernization these media constructed everyday experience as decidedly modern in that it was marked by the same social ills facing industrialized countries The legacy of sensational early twentieth century visual culture remains felt in Mexico and Brazil today where public displays of violence by the military police and organized crime are hypervisible

**City on Fire** Anna Rose Alexander, 2016-09-02 By the mid nineteenth century efforts to modernize and industrialize Mexico City had the unintended consequence of exponentially increasing the risk of fire while also breeding a culture of fear Through an array of archival sources Anna Rose Alexander argues that fire became a catalyst for social change as residents mobilized to confront the problem Advances in engineering and medicine soon fostered the rise of distinct fields of fire related expertise while conversely the rise of fire profiteering industries allowed entrepreneurs to capitalize on crisis City on Fire demonstrates that both public and private engagements with fire risk highlight the inequalities that characterized Mexican society at the turn of the twentieth century

**Consuming Citizens** Iván Eusebio Aguirre Darancou, 2025-05-01 Explores twentieth century Mexican counterculture through the lens of pleasure body autonomy and music and film undergrounds Consuming Citizens offers a fresh conception of twentieth century Mexican cultural production by critically tracing the underside of mestizo modernity Examining a diverse corpus that includes poetry song avant garde film and more from the 1920s to 80s the volume uses queer feminist and psychedelic theories to understand counterculture and especially different acts of consumption as a way of creating culture and alternative social structures Practices of consuming media sex and drugs become means of generating community among subjects who have been marginalized by the nominally inclusive mestizo nation Consuming Citizens thus rethinks nationalism

Kupferschmidt, 2023-10-04 In recent years we have become interested in the diffusion of small Western technologies in the countries of the Middle East during the 19th and 20th centuries the era of Imperialism and first globalization We postulated a contrast between small and big technologies Under the latter category we may understand railway systems electricity grids telegraph networks and steam navigation imposed by foreign powers or installed

by connected local entrepreneurs But many small Western technologies such as sewing machines typewriters pianos eyeglasses and similar consumer goods which had been developed and manufactured in Europe and America were wanted and willingly acquired by the agency of individual users elsewhere In a few cases however the inventions had to be adapted or were overstepped and even delayed Some were adopted as social markers or status symbols only by elites who could afford them Processes of adoption and diffusion therefore differed according to cultural settings preferences and needs Social and cultural historians and social scientists not only of the Middle East will find in this collection of essays a new approach to the impact of Western technological inventions on the Middle East
