Piña Chan,19?? **An Archaeological Guide to Mexico's Yucatán Peninsula** Joyce Kelly,1993 There is nothing like this compact easy to read guide to 91 sites and 8 archaeological museums on Mexico's Yucatan Peninsula a region known worldwide for its magnificent tropical forests and Maya ruins All the major ruins are described in this easy to carry handbook plus dozens not found in other guides Clear photographs drawings maps and site plans illustrate the text This is the only book to list all these sites how to get to them and enough information about each to know whether it is worth visiting and how much time a visit will require Among the ruins not found in other guides are the spectacular and recently discovered Balamku and the lovely Sacbe the location of which was lost for many years Such famous tourist attractions as Chichen Itza Uxmal Tulum and Labna are described in loving detail as are all the sites The sites and museums are rated from 0 to 4 stars so that readers will know at a glance how worthwhile a visit will be Ratings are based on the site's relative importance degree of preservation or restoration and ease of access compared with the visual rewards of the ruin The current name and original names where known are given with phonetic pronunciations The sites are arranged in geographical sections each coordinated with a map or maps The general information about each area includes the availability of accommodations and restaurants car rentals and gas stations The text for each site includes the history of the place and its archaeology and a description of the ruins The author takes care to tell the road connections exact mileages and conditions Where travelers must hire a guide the text names local guides and tells how to get in touch with them A General Advice section at the beginning of the book describes everything from proper clothing and footgear to where to acquire the best maps and other aids Joyce Kelly has visited each site personally Her purpose is to provide readers with up to date information presented as clearly simply and accurately as possible Readers will easily find the exact information they need *Archaeological Tours from Mexico City* Sir Robert Hugh Kirk Marett,1964 *John Lloyd Stephens and Frederick Catherwood* Peter O. Koch,2013-01-16 Daring exploits and astounding achievements were common for two 19th century adventurers John Lloyd Stephens a New York lawyer and best selling author and Frederick Catherwood a London architect and renowned topographical artist Separately these explorers covered much of the same ground touring Italy Greece Egypt Arabia and the Holy Land in search of ancient sites that were of historical significance Jointly these adventurers endured many life threatening obstacles in a determined effort that led to the discovery of nearly fifty forgotten Mayan cities buried deep in the jungles of Central America and Mexico The vivid accounts penned by Stephens coupled with the magnificent drawings of ruins by Catherwood brought back to life a vanished civilization that both considered equal to the greatness of ancient Egypt Greece and Rome The story concludes with the premature and tragic deaths of the two *The Gods' Machines* Wun Chok Bong,2008-05-27 Based on the author's decipherment of prehistoric carvings and the application of mathematical measurements *The Gods' Machines* shows how unknown phenomena from Angkor Wat to Stonehenge to crop circles are actually powerhouses built by an advanced extraterrestrial civilization for tapping electromagnetic energy The book traces

the development of that civilization on Earth over 5 000 years revealing how all these structures are aligned according to a universal formula an angle of 135 degrees at which Earth s energy has been tapped by the alien creators of these monuments These fascinating theories not only explain our distant past but also open the door to a future of power technology and space travel Megalithic sites such as Newgrange and Stonehenge are constructed with quartz and iron rich stones with electrical conduction properties minerals also found atop Aztec temple and inside crop circles These stones according to the author served as dry cell batteries when heated and stressed and supplied energy to the builders traveling vehicles Most interestingly the author has tested his theory on today s crop circles The Gods Machines is certain to stimulate debate among readers interested in alternative history ancient civilization and extraterrestrial intelligence **The Good Alternative**
