Mexico A Study Of An Economically Developing Country:

Developing Country Debt and Economic Performance, Volume 2 Jeffrey D. Sachs, 2007-12-01 For dozens of developing countries the financial upheavals of the 1980s have set back economic development by a decade or more Poverty in those countries has intensified as they struggle under the burden of an enormous external debt In 1988 more than six years after the onset of the crisis almost all the debtor countries were still unable to borrow in the international capital markets on normal terms Moreover the world financial system has been disrupted by the prospect of widespread defaults on those debts Because of the urgency of the present crisis and because similar crises have recurred intermittently for at least 175 years it is important to understand the fundamental features of the international macroeconomy and global financial markets that have contributed to this repeated instability This project on developing country debt undertaken by the National Bureau of Economic Research provides a detailed analysis of the ongoing developing country debt crisis The project focuses on the middle income developing countries particularly those in Latin America and East Asia although many lessons of the study should apply as well to other poorer debtor countries The project analyzes the crisis from two perspectives that of the international financial system as a whole volume 1 and that of individual debtor countries volumes 2 and 3 This second volume contains lengthy and detailed case studies of four Latin American nations Argentina Bolivia Brazil and Mexico providing a wealth of comparative data and new statistics on the general economic development of each nation The authors explore the various factors that contributed to the debt crisis in each country and analyze how the crisis was managed once it had taken hold Trenchant economic analyses are enhanced by assessments of the stark political realities behind the policy choices facing each nation

Economic Policymaking in Mexico Robert E. Looney, 1985 This volume argues that the Mexican crisis of August 1982 in which the country was left facing the prospect of national default and zero economic growth was not only the result of some fundamental flaws in the country's economy but is more accurately characterized as a cash flow problem in the author's words a case of illiquidity rather than insolvency Based on a thorough analysis of the Mexican economy the book assesses the effectiveness of the various economic programs of the de la Madrid presidency in dealing with the nation's problems

Mexico's Economy Robert E. Looney, 2019-03-04 In the spring of 1976 I had the privilege of serving on a Stanford Research Institute team engaged in examining various facets of the Mexican economy That study provided the opportunity to visit many government ministries and talk with some of Mexico's leading economists These professional experiences stimulated me to undertake full scale research on the growth potential of the Mexican economy a subject in which I had long been interested and on which I had written from time to time beginning with my book *Income Distribution Policies and Economic Growth in Semi Industrialized Countries A Comparative Study of Iran Mexico Brazil and South Korea* 1 The present volume might be regarded as the culmination of this endeavor The methodological approach here is partly descriptive and partly empirical illustrative formal models are built on both qualitative and theoretical foundations

To sharpen the issue and put the Mexican economy in perspective international comparisons are made through out

Economic Progress and Policy in Developing Countries Angus Maddison,2013-10-16 First published in 2005 The central issue of our times is the unequal income of nations Its importance outweighs most of the domestic problems in rich countries and the division of the world into rich and poor has become more significant than the ideological cleavage between communism and capitalism There are twenty five rich countries but more than 100 countries who are in the where income range Two thirds of the world's population live in the latter group This study focuses on those countries and looks at economic policy and progress Competition Law in Developing Countries Thomas K.
